Goat Anti-LASP1 (N Terminus) Antibody - Protein Information

Name LASP1

Synonyms MLN50

Function

Plays an important role in the regulation of dynamic actin- based, cytoskeletal activities. Agonist-dependent changes in LASP1 phosphorylation may also serve to regulate actin-associated ion transport activities, not only in the parietal cell but also in certain other F-actin-rich secretory

epithelial cell types (By similarity).

Cellular Location

Cytoplasm, cell cortex. Cytoplasm, cytoskeleton. Note=Associated with the F-actin rich cortical cytoskeleton.

Goat Anti-LASP1 (N Terminus) Antibody - Images

AF1613a staining (0.1 μ g/ml) of Human Brain (Cerebellum) extracts (RIPA buffer, 35 μ g total protein per lane). Primary incubated for 1 hour. Detected by western blot using chemiluminescence.

Goat Anti-LASP1 (N Terminus) Antibody - Background

This gene encodes a member of a LIM protein subfamily characterized by a LIM motif and a domain of Src homology region 3. The encoded protein functions as an actin-binding protein and possibly in cytoskeletal organization.
