

## Goat Anti-MPS1 / RPS27 Antibody

Peptide-affinity purified goat antibody Catalog # AF1681a

#### **Specification**

## Goat Anti-MPS1 / RPS27 Antibody - Product Information

Application WB, E
Primary Accession P42677

Other Accession NP\_001021, 6232, 57294 (mouse), 94266 (rat)

Reactivity
Predicted
Host
Clonality
Concentration
Human
Mouse, Rat
Goat
Polyclonal
100ug/200ul

Isotype IgG
Calculated MW 9461

# Goat Anti-MPS1 / RPS27 Antibody - Additional Information

**Gene ID 6232** 

## **Other Names**

40S ribosomal protein S27, Metallopan-stimulin 1, MPS-1, RPS27, MPS1

#### **Dilution**

WB~~1:1000 E~~N/A

#### **Format**

0.5~mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

## **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

Goat Anti-MPS1 / RPS27 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

#### Goat Anti-MPS1 / RPS27 Antibody - Protein Information

Name RPS27 (<u>HGNC:10416</u>)

**Synonyms MPS1** 

## **Function**

Component of the small ribosomal subunit (PubMed: <a

 $href="http://www.uniprot.org/citations/23636399" target="\_blank">23636399</a>, PubMed:<a href="http://www.uniprot.org/citations/8706699" target="_blank">8706699</a>). The ribosome is a large ribonucleoprotein complex responsible for the synthesis of proteins in the cell (PubMed:<a href="http://www.uniprot.org/citations/23636399" target="_blank">23636399</a>). Required for proper rRNA processing and maturation of 18S rRNAs (PubMed:<a href="http://www.uniprot.org/citations/23636399" target="_blank">23636399</a>).$ 

href="http://www.uniprot.org/citations/25424902" target="\_blank">25424902</a>). Part of the small subunit (SSU) processome, first precursor of the small eukaryotic ribosomal subunit. During the assembly of the SSU processome in the nucleolus, many ribosome biogenesis factors, an RNA chaperone and ribosomal proteins associate with the nascent pre-rRNA and work in concert to generate RNA folding, modifications, rearrangements and cleavage as well as targeted degradation of pre-ribosomal RNA by the RNA exosome (PubMed:<a href="http://www.uniprot.org/citations/34516797" target="blank">34516797</a>).

#### **Cellular Location**

Cytoplasm. Nucleus, nucleolus

#### **Tissue Location**

Expressed in a wide variety of actively proliferating cells and tumor tissues.

## Goat Anti-MPS1 / RPS27 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# Goat Anti-MPS1 / RPS27 Antibody - Images

AF1681a (0.03  $\mu$ g/ml) staining of Jurkat lysate (35  $\mu$ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

#### Goat Anti-MPS1 / RPS27 Antibody - Background

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 40S subunit. The protein belongs to the S27E family of ribosomal proteins. It contains a C4-type zinc finger domain that can bind to zinc. The encoded protein has been shown to be able to bind to nucleic acid. It is located in the cytoplasm as a ribosomal component, but it has also been detected in the nucleus. Studies in rat indicate that ribosomal protein S27 is located near ribosomal protein S18 in the 40S subunit and is covalently linked to translation initiation factor eIF3. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome.
