

**Goat Anti-PIK3CA / P110alpha Antibody**  
**Peptide-affinity purified goat antibody**  
**Catalog # AF1827a****Specification**

---

**Goat Anti-PIK3CA / P110alpha Antibody - Product Information**

Application	IHC, Pep-ELISA
Primary Accession	<a href="#">P42336</a>
Other Accession	<a href="#">NP_006209</a> , <a href="#">5290</a> , <a href="#">18706 (mouse)</a> , <a href="#">170911 (rat)</a>
Reactivity	Human
Predicted	Mouse, Rat, Dog
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	124284

**Goat Anti-PIK3CA / P110alpha Antibody - Additional Information****Gene ID** 5290**Other Names**

Phosphatidylinositol 4, 5-bisphosphate 3-kinase catalytic subunit alpha isoform, PI3-kinase subunit alpha, PI3K-alpha, PI3Kalpha, PtdIns-3-kinase subunit alpha, 2.7.1.153, Phosphatidylinositol 4, 5-bisphosphate 3-kinase 110 kDa catalytic subunit alpha, PtdIns-3-kinase subunit p110-alpha, p110alpha, Phosphoinositide-3-kinase catalytic alpha polypeptide, Serine/threonine protein kinase PIK3CA, 2.7.11.1, PIK3CA

**Dilution**

IHC~~1:100~500

Pep-ELISA~~N/A

**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-PIK3CA / P110alpha Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-PIK3CA / P110alpha Antibody - Protein Information****Name** PIK3CA

## Function

Phosphoinositide-3-kinase (PI3K) phosphorylates phosphatidylinositol (PI) and its phosphorylated derivatives at position 3 of the inositol ring to produce 3-phosphoinositides (PubMed:<a href="http://www.uniprot.org/citations/15135396" target="\_blank">15135396</a>, PubMed:<a href="http://www.uniprot.org/citations/23936502" target="\_blank">23936502</a>, PubMed:<a href="http://www.uniprot.org/citations/28676499" target="\_blank">28676499</a>). Uses ATP and PtdIns(4,5)P<sub>2</sub> (phosphatidylinositol 4,5-bisphosphate) to generate phosphatidylinositol 3,4,5-trisphosphate (PIP<sub>3</sub>) (PubMed:<a href="http://www.uniprot.org/citations/15135396" target="\_blank">15135396</a>, PubMed:<a href="http://www.uniprot.org/citations/28676499" target="\_blank">28676499</a>). PIP<sub>3</sub> plays a key role by recruiting PH domain- containing proteins to the membrane, including AKT1 and PDK1, activating signaling cascades involved in cell growth, survival, proliferation, motility and morphology. Participates in cellular signaling in response to various growth factors. Involved in the activation of AKT1 upon stimulation by receptor tyrosine kinases ligands such as EGF, insulin, IGF1, VEGFA and PDGF. Involved in signaling via insulin-receptor substrate (IRS) proteins. Essential in endothelial cell migration during vascular development through VEGFA signaling, possibly by regulating RhoA activity. Required for lymphatic vasculature development, possibly by binding to RAS and by activation by EGF and FGF2, but not by PDGF. Regulates invadopodia formation through the PDK1-AKT1 pathway. Participates in cardiomyogenesis in embryonic stem cells through a AKT1 pathway. Participates in vasculogenesis in embryonic stem cells through PDK1 and protein kinase C pathway. In addition to its lipid kinase activity, it displays a serine-protein kinase activity that results in the autophosphorylation of the p85alpha regulatory subunit as well as phosphorylation of other proteins such as 4EBP1, H-Ras, the IL-3 beta c receptor and possibly others (PubMed:<a href="http://www.uniprot.org/citations/23936502" target="\_blank">23936502</a>, PubMed:<a href="http://www.uniprot.org/citations/28676499" target="\_blank">28676499</a>). Plays a role in the positive regulation of phagocytosis and pinocytosis (By similarity).

## Goat Anti-PIK3CA / P110alpha Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

## Goat Anti-PIK3CA / P110alpha Antibody - Images

AF1827a (2.5 µg/ml) staining of paraffin embedded Human Brain (Cerebral Cortex). Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

AF1827a (5 µg/ml) staining of paraffin embedded Human Heart. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

EB07512 (2.5 µg/ml) staining of paraffin embedded Human Brain (Cerebellar Cortex). Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

EB07512 (5µg/ml) staining of paraffin embedded Human Heart. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

#### **Goat Anti-PIK3CA / P110alpha Antibody - Background**

Phosphatidylinositol 3-kinase is composed of an 85 kDa regulatory subunit and a 110 kDa catalytic subunit. The protein encoded by this gene represents the catalytic subunit, which uses ATP to phosphorylate PtdIns, PtdIns4P and PtdIns(4,5)P2. This gene has been found to be oncogenic and has been implicated in cervical cancers.
