

# Goat Anti-S100A4 / CAPL Antibody

Peptide-affinity purified goat antibody Catalog # AF1950a

### **Specification**

## Goat Anti-S100A4 / CAPL Antibody - Product Information

Application WB, IHC, E
Primary Accession P26447

Other Accession NP\_062427, 6275, 20198 (mouse), 24615 (rat)

Reactivity Human

Predicted Mouse, Rat, Dog

Host Goat
Clonality Polyclonal
Concentration 100ug/200ul

Isotype IgG
Calculated MW 11729

# Goat Anti-S100A4 / CAPL Antibody - Additional Information

#### **Gene ID 6275**

## **Other Names**

Protein S100-A4, Calvasculin, Metastasin, Placental calcium-binding protein, Protein Mts1, S100 calcium-binding protein A4, S100A4, CAPL, MTS1

#### **Dilution**

WB~~1:1000 IHC~~1:100~500

E~~N/A

#### **Format**

0.5 mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

#### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### **Precautions**

Goat Anti-S100A4 / CAPL Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### Goat Anti-S100A4 / CAPL Antibody - Protein Information

Name S100A4

Synonyms CAPL, MTS1

#### **Function**

Calcium-binding protein that plays a role in various cellular processes including motility, angiogenesis, cell differentiation, apoptosis, and autophagy (PubMed: <a href="http://www.uniprot.org/citations/16707441" target="\_blank">16707441</a>, PubMed:<a href="http://www.uniprot.org/citations/23752197" target="blank">23752197</a>, PubMed:<a href="http://www.uniprot.org/citations/30713770" target="blank">30713770</a>). Increases cell motility and invasiveness by interacting with non-muscle myosin heavy chain (NMMHC) IIA/MYH9 (PubMed:<a href="http://www.uniprot.org/citations/16707441" target=" blank">16707441</a>). Mechanistically, promotes filament depolymerization and increases the amount of soluble myosin-IIA, resulting in the formation of stable protrusions facilitating chemotaxis (By similarity). Also modulates the pro-apoptotic function of TP53 by binding to its C-terminal transactivation domain within the nucleus and reducing its protein levels (PubMed:<a href="http://www.uniprot.org/citations/23752197" target=" blank">23752197</a>). Within the extracellular space, stimulates cytokine production including granulocyte colonystimulating factor and CCL24 from T-lymphocytes (By similarity). In addition, stimulates T-lymphocyte chemotaxis by acting as a chemoattractant complex with PGLYRP1 that promotes lymphocyte migration via CCR5 and CXCR3 receptors (PubMed: <a href="http://www.uniprot.org/citations/26654597" target=" blank">26654597</a>, PubMed:<a href="http://www.uniprot.org/citations/30713770" target="blank">30713770</a>).

#### **Cellular Location**

Secreted. Nucleus Cytoplasm {ECO:0000250|UniProtKB:P07091}

#### **Tissue Location**

Ubiquitously expressed.

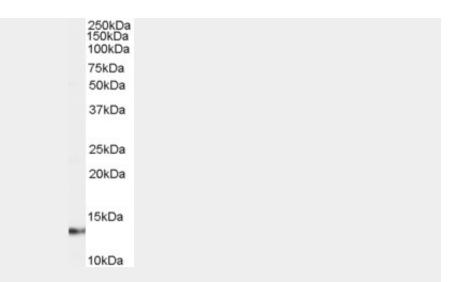

#### Goat Anti-S100A4 / CAPL Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

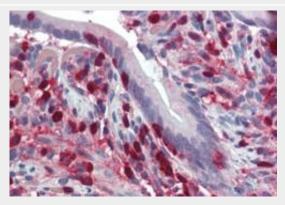

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## Goat Anti-S100A4 / CAPL Antibody - Images

AF1950a (0.03  $\mu$ g/ml) staining of Human Placenta lysate (35  $\mu$ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

AF1950a (2.5  $\mu$ g/ml) staining of paraffin embedded Human Small Intestine. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

### Goat Anti-S100A4 / CAPL Antibody - Background

The protein encoded by this gene is a member of the S100 family of proteins containing 2 EF-hand calcium-binding motifs. S100 proteins are localized in the cytoplasm and/or nucleus of a wide range of cells, and involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. S100 genes include at least 13 members which are located as a cluster on chromosome 1q21. This protein may function in motility, invasion, and tubulin polymerization. Chromosomal rearrangements and altered expression of this gene have been implicated in tumor metastasis. Multiple alternatively spliced variants, encoding the same protein, have been identified.

### Goat Anti-S100A4 / CAPL Antibody - References

S100 proteins interact with the N-terminal domain of MDM2. van Dieck J, et al. FEBS Lett, 2010 Aug 4. PMID 20591429.
