

## **Goat Anti-SP1 Antibody**

Peptide-affinity purified goat antibody Catalog # AF2028a

## **Specification**

## **Goat Anti-SP1 Antibody - Product Information**

Application WB, E
Primary Accession P08047

Other Accession
Reactivity
Predicted
Host
Clonality
Concentration

NP\_003100, 6667
Human, Mouse
Rat, Pig, Dog
Goat
Polyclonal
100ug/200ul

Isotype IgG
Calculated MW 80693

## **Goat Anti-SP1 Antibody - Additional Information**

**Gene ID 6667** 

## **Other Names**

Transcription factor Sp1, SP1, TSFP1

#### **Dilution**

WB~~1:1000

E~~N/A

#### **Format**

0.5~mg~lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

## Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

Goat Anti-SP1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## **Goat Anti-SP1 Antibody - Protein Information**

Name SP1

Synonyms TSFP1

**Function** 

Transcription factor that can activate or repress transcription in response to physiological and pathological stimuli. Binds with high affinity to GC-rich motifs and regulates the expression of a large number of genes involved in a variety of processes such as cell growth, apoptosis, differentiation and immune responses. Highly regulated by post-translational modifications (phosphorylations, sumoylation, proteolytic cleavage, glycosylation and acetylation). Also binds the PDGFR-alpha G-box promoter. May have a role in modulating the cellular response to DNA damage. Implicated in chromatin remodeling. Plays an essential role in the regulation of FE65 gene expression. In complex with ATF7IP, maintains telomerase activity in cancer cells by inducing TERT and TERC gene expression. Isoform 3 is a stronger activator of transcription than isoform 1. Positively regulates the transcription of the core clock component BMAL1 (PubMed: <a href="http://www.uniprot.org/citations/10391891" target="blank">10391891</a>, PubMed:<a href="http://www.uniprot.org/citations/11371615" target="\_blank">11371615</a>, PubMed:<a href="http://www.uniprot.org/citations/11904305" target=" blank">11904305</a>, PubMed:<a href="http://www.uniprot.org/citations/14593115" target="blank">14593115</a>, PubMed:<a href="http://www.uniprot.org/citations/16377629" target="\_blank">16377629</a>, PubMed:<a href="http://www.uniprot.org/citations/16478997" target="blank">16478997</a>, PubMed:<a href="http://www.uniprot.org/citations/16943418" target="blank">16943418</a>, PubMed:<a href="http://www.uniprot.org/citations/17049555" target="\_blank">17049555</a>, PubMed:<a href="http://www.uniprot.org/citations/18171990" target=" blank">18171990</a>, PubMed:<a href="http://www.uniprot.org/citations/18199680" target="blank">18199680</a>, PubMed:<a href="http://www.uniprot.org/citations/18239466" target=" blank">18239466</a>, PubMed:<a href="http://www.uniprot.org/citations/18513490" target="blank">18513490</a>, PubMed:<a href="http://www.uniprot.org/citations/18619531" target="\_blank">18619531</a>, PubMed:<a href="http://www.uniprot.org/citations/19193796" target="blank">19193796</a>, PubMed:<a href="http://www.uniprot.org/citations/20091743" target="\_blank">20091743</a>, PubMed:<a href="http://www.uniprot.org/citations/21046154" target="blank">21046154</a>, PubMed:<a href="http://www.uniprot.org/citations/21798247" target="blank">21798247</a>). Plays a role in the recruitment of SMARCA4/BRG1 on the c-FOS promoter. Plays a role in protecting cells against oxidative stress following brain injury by regulating the expression of RNF112 (By similarity).

#### **Cellular Location**

Nucleus. Cytoplasm. Note=Nuclear location is governed by glycosylated/phosphorylated states. Insulin promotes nuclear location, while glucagon favors cytoplasmic location

## **Tissue Location**

Up-regulated in adenocarcinomas of the stomach (at protein level). Isoform 3 is ubiquitously expressed at low levels

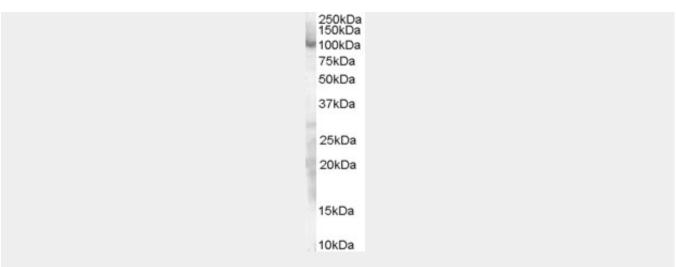

## Goat Anti-SP1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## Goat Anti-SP1 Antibody - Images

AF2028a staining (0.3  $\mu$ g/ml) of Hela lysate (RIPA buffer, 30  $\mu$ g total protein per lane). Primary incubated for 1 hour. Detected by western blot using chemiluminescence.
