HMHA1 / HA-1 Antibody (C-Term) - Protein Information**Name** ARHGAP45 ([HGNC:17102](#))**Function**

Contains a GTPase activator for the Rho-type GTPases (RhoGAP) domain that would be able to negatively regulate the actin cytoskeleton as well as cell spreading. However, also contains N-terminally a BAR- domain which is able to play an autoinhibitory effect on this RhoGAP activity.

Cellular Location

Cytoplasm. Cell projection, ruffle membrane

Tissue Location

Expressed on cells of the hematopoietic lineage. Detected in dendritic cells and epidermal Langerhans cells. Expressed in peripheral blood mononuclear cells, in all leukemia/lymphoma cell lines. Detected also in some solid tumors and tissues such as cancerous and non-cancerous tissue.
