

CECR2 Antibody (C-Term)

Peptide-affinity purified goat antibody Catalog # AF2309a

Specification

CECR2 Antibody (C-Term) - Product Information

Application E

Primary Accession Q9BXF3

Other Accession AAK15343.1, 27443

Predicted Human, Dog

Host Goat
Clonality Polyclonal
Concentration 0.5 mg/ml

Isotype IgG
Calculated MW 164213

CECR2 Antibody (C-Term) - Additional Information

Gene ID 27443

Other Names

Cat eye syndrome critical region protein 2, CECR2, KIAA1740

Format

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

CECR2 Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

CECR2 Antibody (C-Term) - Protein Information

Name CECR2

Synonyms KIAA1740

Function

Regulatory subunit of the ATP-dependent CERF-1 and CERF-5 ISWI chromatin remodeling complexes, which form ordered nucleosome arrays on chromatin and facilitate access to DNA during DNA-templated processes such as DNA replication, transcription, and repair (PubMed:15640247, PubMed:26365797, PubMed:28801535, PubMed:<a

href="http://www.uniprot.org/citations/22464331" target="_blank">22464331). The complexes do not have the ability to slide mononucleosomes to the center of a DNA template (PubMed:28801535). The CERF-1 ISWI chromatin remodeling complex has a lower ATP hydrolysis rate than the CERF-5 ISWI chromatin remodeling complex (PubMed:28801535). Plays a role in various processes during development: required during embryogenesis for neural tube closure and inner ear development. In adults, required for spermatogenesis, via the formation of ISWI-type chromatin complexes (By similarity). In histone-modifying complexes, CECR2 recognizes and binds acylated histones: binds histones that are acetylated and/or butyrylated (PubMed:26365797, PubMed:22464331). May also be involved through its interaction with LRPPRC in the integration of cytoskeletal network with vesicular trafficking, nucleocytosolic shuttling, transcription, chromosome remodeling and cytokinesis (PubMed:11827465).

Cellular Location

Nucleus.

Tissue Location

Highly expressed in skeletal muscle, thymus, placenta and lung. Expressed at lower level in brain, heart, colon, spleen, kidney

CECR2 Antibody (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

CECR2 Antibody (C-Term) - Images

CECR2 Antibody (C-Term) - Background

The peptide sequence used (from AAK15343.1) differs by one residue from the RefSeq entry (XP_931107.2). It is not known whether this difference is due to a sequencing error or polymophism but the antibody is expected to recognize both sequences.
