

NEK7 (aa 274-286) Antibody (C-Term)
Peptide-affinity purified goat antibody
Catalog # AF3392a**Specification**

NEK7 (aa 274-286) Antibody (C-Term) - Product Information

Application	WB, E
Primary Accession	Q8TDX7
Other Accession	NP_598001.1 , 140609 , 59125 (mouse) , 360850 (rat)
Reactivity	Human, Mouse
Predicted	Rat, Dog
Host	Goat
Clonality	Polyclonal
Concentration	0.5 mg/ml
Isotype	IgG
Calculated MW	34551

NEK7 (aa 274-286) Antibody (C-Term) - Additional Information**Gene ID** 140609**Other Names**

Serine/threonine-protein kinase Nek7, 2.7.11.1, Never in mitosis A-related kinase 7, NimA-related protein kinase 7, NEK7

Dilution

WB~~1:1000

E~~N/A

Format

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

NEK7 (aa 274-286) Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

NEK7 (aa 274-286) Antibody (C-Term) - Protein Information**Name** NEK7 {ECO:0000303|PubMed:11701951, ECO:0000312|HGNC:HGNC:13386}**Function**

Protein kinase which plays an important role in mitotic cell cycle progression (PubMed:<a

[17101132](http://www.uniprot.org/citations/17101132), PubMed: [19941817](http://www.uniprot.org/citations/19941817), PubMed: [31409757](http://www.uniprot.org/citations/31409757)). Required for microtubule nucleation activity of the centrosome, robust mitotic spindle formation and cytokinesis (PubMed: [17586473](http://www.uniprot.org/citations/17586473) [19414596](http://www.uniprot.org/citations/19414596) [19941817](http://www.uniprot.org/citations/19941817) [26522158](http://www.uniprot.org/citations/26522158) [31409757](http://www.uniprot.org/citations/31409757)). Phosphorylates EML4 at 'Ser-146', promoting its dissociation from microtubules during mitosis which is required for efficient chromosome congression (PubMed: [31409757](http://www.uniprot.org/citations/31409757)). Phosphorylates RPS6KB1 (By similarity). Acts as an essential activator of the NLRP3 inflammasome assembly independently of its kinase activity (PubMed: [26642356](http://www.uniprot.org/citations/26642356) [36442502](http://www.uniprot.org/citations/36442502) [39173637](http://www.uniprot.org/citations/39173637)). Acts by unlocking NLRP3 following NLRP3 translocation into the microtubule organizing center (MTOC), relieving NLRP3 autoinhibition and promoting formation of the NLRP3:PYCARD complex, and activation of CASP1 (PubMed: [26642356](http://www.uniprot.org/citations/26642356) [31189953](http://www.uniprot.org/citations/31189953) [36442502](http://www.uniprot.org/citations/36442502) [39173637](http://www.uniprot.org/citations/39173637)). Serves as a cellular switch that enforces mutual exclusivity of the inflammasome response and cell division: interaction with NEK9 prevents interaction with NLRP3 and activation of the inflammasome during mitosis (PubMed: [26642356](http://www.uniprot.org/citations/26642356) [31189953](http://www.uniprot.org/citations/31189953)).

Cellular Location

Nucleus {ECO:0000250|UniProtKB:Q9ES74}. Cytoplasm. Cytoplasm, cytoskeleton, spindle pole. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome. Note=Present at centrosome throughout the cell cycle (PubMed:17586473). Also detected at spindle midzone of the anaphase cells and eventually concentrates at the midbody (PubMed:17586473). Interaction with ANKS3 prevents its translocation to the nucleus (By similarity). {ECO:0000250|UniProtKB:Q9ES74, ECO:0000269|PubMed:17586473}

Tissue Location

Highly expressed in lung, muscle, testis, brain, heart, liver, leukocyte and spleen. Lower expression in ovary, prostate and kidney. No expression seen in small intestine

NEK7 (aa 274-286) Antibody (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

NEK7 (aa 274-286) Antibody (C-Term) - Images

AF3392a (0.1 µg/ml) staining of Human Lung lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

AF3392a (0.3 µg/ml) staining of Mouse Lung (A) and Rat Lung (B) lysates (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
