

HP beta chain Antibody (internal region)

Peptide-affinity purified goat antibody Catalog # AF3661a

Specification

HP beta chain Antibody (internal region) - Product Information

Application WB, E
Primary Accession P00738

Other Accession NP_005134.1, NP_001119574.1, 3240

Reactivity Human, Pig

Predicted Dog
Host Goat
Clonality Polyclonal
Concentration 0.5 mg/ml
Isotype IgG
Calculated MW 45205

HP beta chain Antibody (internal region) - Additional Information

Gene ID 3240

Other Names

Haptoglobin, Zonulin, Haptoglobin alpha chain, Haptoglobin beta chain, HP

Dilution

WB~~1:1000 E~~N/A

Format

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

HP beta chain Antibody (internal region) is for research use only and not for use in diagnostic or therapeutic procedures.

HP beta chain Antibody (internal region) - Protein Information

Name HP

Function

As a result of hemolysis, hemoglobin is found to accumulate in the kidney and is secreted in the urine. Haptoglobin captures, and combines with free plasma hemoglobin to allow hepatic recycling of heme iron and to prevent kidney damage. Haptoglobin also acts as an antioxidant, has

antibacterial activity, and plays a role in modulating many aspects of the acute phase response. Hemoglobin/haptoglobin complexes are rapidly cleared by the macrophage CD163 scavenger receptor expressed on the surface of liver Kupfer cells through an endocytic lysosomal degradation pathway.

Cellular Location Secreted.

Tissue Location

Expressed by the liver and secreted in plasma.

HP beta chain Antibody (internal region) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

HP beta chain Antibody (internal region) - Images

AF3661a (0.1 μ g/ml) staining of Human Liver lysate (35 μ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

HP beta chain Antibody (internal region) - Background

This antibody is expected to recognize both reported isoforms (NP_005134.1; NP_001119574.1).
