

**KD-Validated Anti-Histone acetyltransferase 1 Rabbit Monoclonal Antibody**  
**Rabbit monoclonal antibody**  
**Catalog # AGI1051****Specification****KD-Validated Anti-Histone acetyltransferase 1 Rabbit Monoclonal Antibody - Product Information**

Application	WB, FC, ICC
Primary Accession	<a href="#">O14929</a>
Reactivity	Rat, Human, Mouse
Clonality	Monoclonal
Isotype	Rabbit IgG
Calculated MW	Predicted, 50 kDa , observed, 45 kDa
Gene Name	KDa
Aliases	HAT1 HAT1; Histone Acetyltransferase 1; KAT1; Histone Acetyltransferase Type B Catalytic Subunit; EC 2.3.1.48
Immunogen	A synthesized peptide derived from human KAT1 / HAT1

**KD-Validated Anti-Histone acetyltransferase 1 Rabbit Monoclonal Antibody - Additional Information**

Gene ID	8520
<b>Other Names</b>	
Histone acetyltransferase type B catalytic subunit, 2.3.1.48, Histone acetyltransferase 1, HAT1, KAT1	

**KD-Validated Anti-Histone acetyltransferase 1 Rabbit Monoclonal Antibody - Protein Information****Name** HAT1**Synonyms** KAT1**Function**

Histone acetyltransferase that plays a role in different biological processes including cell cycle progression, glucose metabolism, histone production or DNA damage repair (PubMed:[20953179](http://www.uniprot.org/citations/20953179), PubMed:[23653357](http://www.uniprot.org/citations/23653357), PubMed:[31278053](http://www.uniprot.org/citations/31278053), PubMed:[32081014](http://www.uniprot.org/citations/32081014)). Coordinates histone production and acetylation via H4 promoter binding (PubMed:[31278053](http://www.uniprot.org/citations/31278053)). Acetylates histone H4 at 'Lys-5' (H4K5ac) and 'Lys-12' (H4K12ac) and, to a lesser extent, histone H2A at 'Lys-5' (H2AK5ac) (PubMed:[11585814](http://www.uniprot.org/citations/11585814), PubMed:[22615379](http://www.uniprot.org/citations/22615379)). Drives H4 production by chromatin binding to support

chromatin replication and acetylation. Since transcription of H4 genes is tightly coupled to S-phase, plays an important role in S-phase entry and progression (PubMed:<a href="http://www.uniprot.org/citations/31278053" target="\_blank">31278053</a>). Promotes homologous recombination in DNA repair by facilitating histone turnover and incorporation of acetylated H3.3 at sites of double-strand breaks (PubMed:<a href="http://www.uniprot.org/citations/23653357" target="\_blank">23653357</a>). In addition, acetylates other substrates such as chromatin-related proteins (PubMed:<a href="http://www.uniprot.org/citations/32081014" target="\_blank">32081014</a>). Also acetylates RSAD2 which mediates the interaction of ubiquitin ligase UBE4A with RSAD2 leading to RSAD2 ubiquitination and subsequent degradation (PubMed:<a href="http://www.uniprot.org/citations/31812350" target="\_blank">31812350</a>).

### Cellular Location

[Isoform A]: Nucleus matrix Mitochondrion

## KD-Validated Anti-Histone acetyltransferase 1 Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

## KD-Validated Anti-Histone acetyltransferase 1 Rabbit Monoclonal Antibody - Images

Western blotting analysis using anti-Histone acetyltransferase 1 antibody (Cat#61169). Total cell lysates (30 µg) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-Histone acetyltransferase 1 antibody (Cat#61169, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody (Cat#201, 1:20,000) respectively. Image was developed using FeQ™ ECL Substrate Kit (Cat#226).

Western blotting analysis using anti-Histone acetyltransferase 1 antibody (Cat#61169). Histone acetyltransferase 1 expression in wild type (WT) and histone acetyltransferase 1 shRNA knockdown (KD) HeLa cells with 30 µg of total cell lysates. β-Tubulin serves as a loading control. The blot was incubated with anti-Histone acetyltransferase 1 antibody (Cat#61169, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody (Cat#201, 1:20,000) respectively. Image was developed using FeQ™ ECL Substrate Kit (Cat#226).

Flow cytometric analysis of Histone acetyltransferase 1 expression in HeLa cells using Histone acetyltransferase 1 antibody (Cat#61169, 1:2,000). Green, isotype control; red, Histone acetyltransferase 1.

Immunocytochemical staining of HeLa cells with Histone acetyltransferase 1 antibody (Cat#61169, 1:1,000). Nuclei were stained blue with DAPI; Histone acetyltransferase 1 was stained magenta with Alexa Fluor® 647. Images were taken using Leica stellaris 5. Protein abundance based on laser Intensity and smart gain: Medium. Scale bar: 20 µm.
