

KD-Validated Anti-Growth factor receptor bound protein 2 Rabbit Monoclonal Antibody

Rabbit monoclonal antibody

Catalog # AGI1558

Specification

KD-Validated Anti-Growth factor receptor bound protein 2 Rabbit Monoclonal Antibody -**Product Information**

Application WB, FC **Primary Accession** P62993

Reactivity Rat, Human, Mouse

Clonality Monoclonal Isotype Rabbit IqG

Calculated MW Predicted, 25 kDa, observed, 25 kDa KDa

Gene Name

Aliases **GRB2**; Growth Factor Receptor Bound

> **Protein 2: Growth Factor Receptor-Bound** Protein 2; NCKAP2; SH2/SH3 Adapter

GRB2; Protein Ash; ASH; Epidermal Growth Factor Receptor-Binding Protein GRB2; **Epididymis Secretory Sperm Binding Protein; Growth Factor Receptor-Bound Protein 3: Antibodyundant SRC Homology:** Adapter Protein GRB2; EGFRBP-GRB2;

MSTP084; Grb3-3; MST084; HT027

A synthesized peptide derived from human **Immunogen**

GRB2

KD-Validated Anti-Growth factor receptor bound protein 2 Rabbit Monoclonal Antibody -**Additional Information**

Gene ID 2885

Other Names

Growth factor receptor-bound protein 2, Adapter protein GRB2, Protein Ash, SH2/SH3 adapter GRB2, GRB2, ASH

KD-Validated Anti-Growth factor receptor bound protein 2 Rabbit Monoclonal Antibody -**Protein Information**

Name GRB2

Synonyms ASH

Function

Non-enzymatic adapter protein that plays a pivotal role in precisely regulated signaling cascades from cell surface receptors to cellular responses, including signaling transduction and gene expression (PubMed:11726515, PubMed:<a href="http://www.uniprot.org/citations/37626338"

target=" blank">37626338). Thus, participates in many biological processes including

regulation of innate and adaptive immunity, autophagy, DNA repair or necroptosis (PubMed:35831301, PubMed:37626338, PubMed:38182563). Controls signaling complexes at the T-cell antigen receptor to facilitate the activation, differentiation, and function of T-cells (PubMed:36864087, PubMed:36864087, PubMed:<a href="http://www.uniprot.org/citations/9489702"

target="_blank">9489702). Mechanistically, engagement of the TCR leads to phosphorylation of the adapter protein LAT, which serves as docking site for GRB2 (PubMed:9489702). In turn, GRB2 establishes a connection with SOS1 that acts as a guanine nucleotide exchange factor and serves as a critical regulator of KRAS/RAF1 leading to MAPKs translocation to the nucleus and activation (PubMed:<a href="http://www.uniprot.org/citations/12171928"

target="_blank">12171928, PubMed:25870599). Functions also a role in B-cell activation by amplifying Ca(2+) mobilization and activation of the ERK MAP kinase pathway upon recruitment to the phosphorylated B-cell antigen receptor (BCR) (PubMed:25413232, PubMed:29523808). Plays a role in switching between autophagy and programmed necrosis upstream of EGFR by interacting with components of necrosomes including RIPK1 and with autophagy regulators SQSTM1 and BECN1 (PubMed:35831301, PubMed:38182563). Regulates miRNA biogenesis by forming a functional ternary complex with AGO2 and DICER1 (PubMed:37328606). Functions in the replication stress response by protecting DNA at stalled replication forks from MRE11-mediated degradation. Mechanistically, inhibits RAD51 ATPase activity to stabilize RAD51 on stalled replication forks (PubMed:38459011(PubMed:38459011(A). Additionally, directly recruits and later releases MRE11 at DNA damage sites during the homology-directed repair (HDR) process (PubMed:34348893/a>).

Cellular Location

Nucleus. Cytoplasm. Endosome. Golgi apparatus {ECO:0000250|UniProtKB:Q60631}

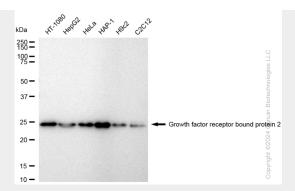

KD-Validated Anti-Growth factor receptor bound protein 2 Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

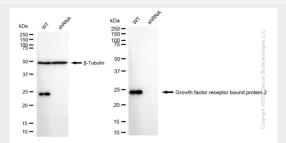

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

KD-Validated Anti-Growth factor receptor bound protein 2 Rabbit Monoclonal Antibody - Images

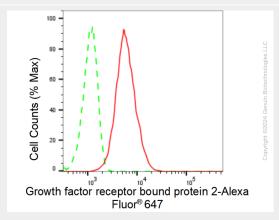

Western blotting analysis using anti-Growth factor receptor bound protein 2 antibody (Cat#62157). Total cell lysates (30 μ g) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-Growth factor receptor bound protein 2 antibody (Cat#62157, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody (Cat#201, 1:20,000) respectively. Image was developed using FeQ $^{\text{TM}}$ ECL Substrate Kit (Cat#226).

Western blotting analysis using anti-Growth factor receptor bound protein 2 antibody (Cat#62157). Growth factor receptor bound protein 2 expression in wild type (WT) and Growth factor receptor bound protein 2 shRNA knockdown (KD) HeLa cells with 30 μ g of total cell lysates. β -Tubulin serves as a loading control. The blot was incubated with anti-Growth factor receptor bound protein 2 antibody (Cat#62157, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody (Cat#201, 1:20,000) respectively. Image was developed using FeQTM ECL Substrate Kit (Cat#226).

Flow cytometric analysis of Growth factor receptor bound protein 2 expression in HT-1080 cells using Growth factor receptor bound protein 2 antibody (Cat#62157, 1:2,000). Green, isotype control; red, Growth factor receptor bound protein 2.
