

KD-Validated Anti-Proliferating Cell Nuclear Antigen Rabbit Polyclonal Antibody

Rabbit polyclonal antibody Catalog # AGI1774

Specification

KD-Validated Anti-Proliferating Cell Nuclear Antigen Rabbit Polyclonal Antibody - Product Information

Application WB
Primary Accession P12004

Reactivity Rat, Human, Mouse

Clonality Polyclonal Isotype Rabbit IgG

Calculated MW Predicted, 29 kDa , o bserved , 36 kDa

KDa

Gene Name PCNA

Aliases PCNA; Proliferating Cell Nuclear Antigen;

Cyclin; DNA Polymerase Delta Auxiliary

Protein; ATLD2

Immunogen A synthesized peptide derived from human

PCNA

KD-Validated Anti-Proliferating Cell Nuclear Antigen Rabbit Polyclonal Antibody - Additional Information

Gene ID **5111**

Other Names

Proliferating cell nuclear antigen, PCNA, Cyclin, PCNA

KD-Validated Anti-Proliferating Cell Nuclear Antigen Rabbit Polyclonal Antibody - Protein Information

Name PCNA

Function

Auxiliary protein of DNA polymerase delta and epsilon, is involved in the control of eukaryotic DNA replication by increasing the polymerase's processibility during elongation of the leading strand (PubMed:35585232). Induces a robust stimulatory effect on the 3'-5' exonuclease and 3'-phosphodiesterase, but not apurinic-apyrimidinic (AP) endonuclease, APEX2 activities. Has to be loaded onto DNA in order to be able to stimulate APEX2. Plays a key role in DNA damage response (DDR) by being conveniently positioned at the replication fork to coordinate DNA replication with DNA repair and DNA damage tolerance pathways (PubMed:24939902 hat a loading platform to recruit DDR proteins that allow completion of DNA replication after DNA damage and promote postreplication repair:

Monoubiquitinated PCNA leads to recruitment of translesion (TLS) polymerases, while 'Lys-63'-linked polyubiquitination of PCNA is involved in error-free pathway and employs recombination mechanisms to synthesize across the lesion (PubMed:24695737/a>).

Cellular Location

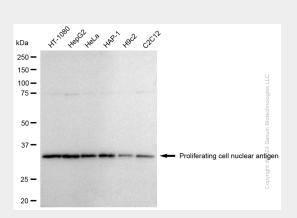

Nucleus. Note=Colocalizes with CREBBP, EP300 and POLD1 to sites of DNA damage (PubMed:24939902). Forms nuclear foci representing sites of ongoing DNA replication and vary in morphology and number during S phase (PubMed:15543136). Co-localizes with SMARCA5/SNF2H and BAZ1B/WSTF at replication foci during S phase (PubMed:15543136). Together with APEX2, is redistributed in discrete nuclear foci in presence of oxidative DNA damaging agents

KD-Validated Anti-Proliferating Cell Nuclear Antigen Rabbit Polyclonal Antibody - Protocols

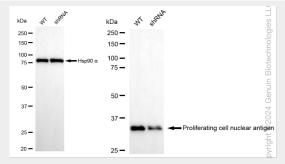

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

KD-Validated Anti-Proliferating Cell Nuclear Antigen Rabbit Polyclonal Antibody - Images

Western blotting analysis using anti-Proliferating cell nuclear antigen antibody (Cat#AGI1774). Total cell lysates (30 μ g) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-Proliferating cell nuclear antigen antibody (Cat#AGI1774, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.

Western blotting analysis using anti-Proliferating cell nuclear antigen antibody (Cat#AGI1774). Proliferating cell nuclear antigen expression in wild type (WT) and Proliferating cell nuclear antigen shRNA knockdown (KD) HeLa cells with 30 μ g of total cell lysates. Hsp90 α serves as a loading control. The blot was incubated with anti-Proliferating cell nuclear antigen antibody

(Cat#AGI1774, 1:5,000) and HI	RP-conjugated goat anti-rabbit	secondary antibody	respectively.
