### KD-Validated Anti-Galectin 1 Rabbit Polyclonal Antibody - Protein Information

Name LGALS1 (<u>HGNC:6561</u>)

### Function

Lectin that binds beta-galactoside and a wide array of complex carbohydrates. Plays a role in regulating apoptosis, cell proliferation and cell differentiation. Inhibits CD45 protein phosphatase activity and therefore the dephosphorylation of Lyn kinase. Strong inducer of T-cell apoptosis. Plays a negative role in Th17 cell differentiation via activation of the receptor CD69 (PubMed:<a href="http://www.uniprot.org/citations/24752896" target="\_blank">24752896</a>).

### **Cellular Location**

Secreted, extracellular space, extracellular matrix. Cytoplasm. Secreted Note=Can be secreted; the secretion is dependent on protein unfolding and facilitated by the cargo receptor TMED10; it results in protein translocation from the cytoplasm into the ERGIC (endoplasmic reticulum- Golgi intermediate compartment) followed by vesicle entry and secretion.

#### Tissue Location

Expressed in placenta, maternal decidua and fetal membranes. Within placenta, expressed in trophoblasts, stromal cells, villous endothelium, syncytiotrophoblast apical membrane and villous stroma. Within fetal membranes, expressed in amnion, chorioamniotic mesenchyma and chorion (at protein level). Expressed in cardiac, smooth, and skeletal muscle, neurons, thymus, kidney and hematopoietic cells.

## KD-Validated Anti-Galectin 1 Rabbit Polyclonal Antibody - Images

Western blotting analysis using anti-galectin 1 antibody (Cat#AGI2126). Total cell lysates (30 µg) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-galectin 1 antibody (Cat#AGI2126, 1:2,500) and HRP-conjugated goat anti-rabbit secondary antibody respectively.

Western blotting analysis using anti-galectin 1 antibody (Cat #AGI2126). Galectin 1 expression in wild-type (WT) and galectin 1 (LGALS1) shRNA knockdown (KD) HeLa cells with 20  $\mu$ g of total cell lysates. Hsp90  $\alpha$  serves as a loading control. The blot was incubated with anti-galectin 1 antibody (Cat #AGI2126, 1:2,500) and HRP-conjugated goat anti-rabbit secondary antibody respectively.
