KD-Validated Anti-Bone morphogenetic protein 6 Rabbit Monoclonal Antibody - Protein Information**Name** BMP6**Synonyms** VGR**Function**

Growth factor of the TGF-beta superfamily that plays essential roles in many developmental processes including cartilage and bone formation (PubMed: [31019025](http://www.uniprot.org/citations/31019025)). Also plays an important role in the regulation of HAMP/hepcidin expression and iron metabolism by acting as a ligand for hemojuvelin/HJV (PubMed: [26582087](http://www.uniprot.org/citations/26582087)). Also acts to promote expression of HAMP, potentially via the interaction with its receptor BMPRI/ALK3 (PubMed: [30097509](http://www.uniprot.org/citations/30097509), PubMed: [31800957](http://www.uniprot.org/citations/31800957)). Initiates the canonical BMP signaling cascade by associating with type I receptor ACVR1 and type II receptor ACVR2B (PubMed: [18070108](http://www.uniprot.org/citations/18070108)). In turn, ACVR1 propagates signal by phosphorylating

SMAD1/5/8 that travel to the nucleus and act as activators and repressors of transcription of target. Can also signal through non-canonical pathway such as TAZ-Hippo signaling cascade to modulate VEGF signaling by regulating VEGFR2 expression (PubMed:33021694).

Western blotting analysis using anti-Bone morphogenetic protein 6 antibody (Cat#AGI2332). Total cell lysates (30 µg) from various cell lines were loaded and separated by SDS-PAGE. The blot was incubated with anti-Bone morphogenetic protein 6 antibody (Cat#AGI2332, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.

Western blotting analysis using anti-Bone morphogenetic protein 6 antibody (Cat#AGI2332). Bone morphogenetic protein 6 expression in wild type (WT) and Bone morphogenetic protein 6 shRNA knockdown (KD) HeLa cells with 30 µg of total cell lysates. Hsp90 α serves as a loading control. The blot was incubated with anti-Bone morphogenetic protein 6 antibody (Cat#AGI2332, 1:5,000) and HRP-conjugated goat anti-rabbit secondary antibody respectively.
