

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide Mouse Monoclonal Antibody [Clone SPM357]

Catalog # AH10761

Specification

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide - Product Information

Application IF, FC
Primary Accession P01135

Other Accession <u>7039</u>, <u>170009</u>

Reactivity Human, Mouse, Rat, Bovine

Host Mouse Clonality Monoclonal

Isotype Mouse / IgG1, kappa

Calculated MW ~6kDa KDa

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide - Additional Information

Gene ID 7039

Other Names

Protransforming growth factor alpha, Transforming growth factor alpha, TGF-alpha, EGF-like TGF, ETGF, TGF type 1, TGFA

Application Note

IF~~1:50~200<br \> FC~~1:10~50

Format

200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage

Store at 2 to 8°C. Antibody is stable for 24 months.

Precautions

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide - Protein Information

Name TGFA

Function

TGF alpha is a mitogenic polypeptide that is able to bind to the EGF receptor/EGFR and to act synergistically with TGF beta to promote anchorage-independent cell proliferation in soft agar.

Cellular Location

[Transforming growth factor alpha]: Secreted, extracellular space

Tissue Location

Isoform 1, isoform 3 and isoform 4 are expressed in keratinocytes and tumor-derived cell lines

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide - Images

TGF-alpha (Transforming Growth Factor alpha) Antibody - With BSA and Azide - Background

This antibody reacts with the C-terminus of TGF alpha and shows no cross-reaction with EGF and the neuropeptide synenkephalin. The staining with Ab-1 is completely blocked by the peptide used for raising this antibody. TGFĪ � (aa50) is a growth factor with 33% homology to EGF, binds to EGFR, activates tyrosine phosphorylation of the receptor, and stimulates cell proliferation. It plays a role in tumor initiation by inducing the reversible transformed phenotype.
