

**TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide**  
**Mouse Monoclonal Antibody [Clone TRIM29/1041 ]**  
**Catalog # AH11233****Specification****TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide -**  
**Product Information**

Application	IHC, IF, FC
Primary Accession	<a href="#">Q14134</a>
Other Accession	<a href="#">23650</a> , <a href="#">504115</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	Mouse / IgG2a, kappa
Calculated MW	66kDa kDa

**TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide -**  
**Additional Information****Gene ID** 23650**Other Names**

Tripartite motif-containing protein 29, Ataxia telangiectasia group D-associated protein, TRIM29, ATDC

**Application Note**

&lt;span class="dilution\_IHC"&gt;IHC~~1:100~500&lt;/span&gt;&lt;br \&gt;&lt;span class="dilution\_IF"&gt;IF~~1:50~200&lt;/span&gt;&lt;br \&gt;&lt;span class="dilution\_FC"&gt;FC~~1:10~50&lt;/span&gt;

**Storage**

Store at 2 to 8°C. Antibody is stable for 24 months.

**Precautions**

TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

**TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide -**  
**Protein Information****Name** TRIM29**Synonyms** ATDC**Function**

Plays a crucial role in the regulation of macrophage activation in response to viral or bacterial infections within the respiratory tract. Mechanistically, TRIM29 interacts with IKBKG/NEMO in the lysosome where it induces its 'Lys-48' ubiquitination and subsequent degradation. In turn, the expression of type I interferons and the production of pro-inflammatory cytokines are inhibited.

Additionally, induces the 'Lys-48' ubiquitination of STING1 in a similar way, leading to its degradation.

**Cellular Location**

Cytoplasm. Lysosome. Note=Colocalizes with intermediate filaments

**Tissue Location**

Expressed in placenta, prostate and thymus.

**TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide - Images**

Formalin-fixed, paraffin-embedded human Lung Squamous Cell Carcinoma stained with TRIM29 Monoclonal Antibody (TRIM29/1041).

Formalin-fixed, paraffin-embedded human Esophageal carcinoma stained with TRIM29 Monoclonal Antibody (TRIM29/1041).

### **TRIM29 (Lung Squamous Cell Carcinoma Marker) Antibody - With BSA and Azide - Background**

It recognizes a 66kDa protein, which is identified as Tripartite motif-containing protein 29 (TRIM29). It interacts with the intermediate filament protein vimentin, a substrate for the PKC family of protein kinases, and with hPKCI-1, an inhibitor of the PKCs. TRIM29 protein contains both zinc finger and leucine zipper motifs, suggesting that the it may form homodimers and possibly associate with DNA. High expression of TRIM29 has been reported in gastric cancer and pancreatic cancer, and correlates with enhanced tumor growth and lymph node metastasis. TRIM29 is also able to distinguish lung squamous cell carcinoma from lung adenocarcinoma with ~90% positive accuracy, when used in a panel with TTF-1, p63, CK5/6, and Napsin-A antibodies.
