

## IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide

Rat Monoclonal Antibody [Clone IL6/1270 ]
Catalog # AH11578

### **Specification**

### IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide - Product Information

Application Primary Accession Other Accession Reactivity Host

Clonality Isotype

Calculated MW

IHC, IF, FC P05231

3569, 654458 Human, Mouse

Rat

Monoclonal

Rat / IgG1, kappa

21kDa KDa

## IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide - Additional Information

#### **Gene ID 3569**

#### **Other Names**

Interleukin-6, IL-6, B-cell stimulatory factor 2, BSF-2, CTL differentiation factor, CDF, Hybridoma growth factor, Interferon beta-2, IFN-beta-2, IL6, IFNB2

### **Application Note**

<span class ="dilution\_IHC">IHC~~1:100~500</span><br \> <span class = "dilution\_IF">IF~~1:50~200</span><br \> <span class = "dilution\_FC">FC~~1:10~50</span>

#### **Storage**

Store at 2 to 8°C. Antibody is stable for 24 months.

#### **Precautions**

IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

## IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide - Protein Information

#### Name IL6 (<u>HGNC:6018</u>)

### **Synonyms IFNB2**

### **Function**

Cytokine with a wide variety of biological functions in immunity, tissue regeneration, and metabolism. Binds to IL6R, then the complex associates to the signaling subunit IL6ST/gp130 to trigger the intracellular IL6-signaling pathway (Probable). The interaction with the

membrane-bound IL6R and IL6ST stimulates 'classic signaling', whereas the binding of IL6 and soluble IL6R to IL6ST stimulates 'trans- signaling'. Alternatively, 'cluster signaling' occurs when membrane- bound IL6:IL6R complexes on transmitter cells activate IL6ST receptors on neighboring receiver cells (Probable).

**Cellular Location** Secreted.

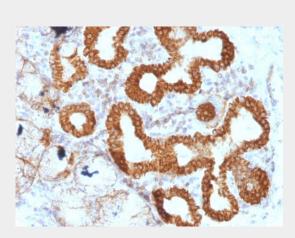

**Tissue Location**Produced by skeletal muscle.

## IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide - Protocols

Provided below are standard protocols that you may find useful for product applications.

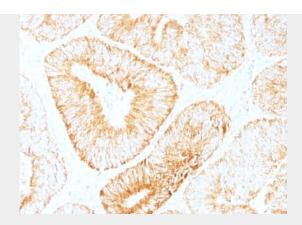

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Formalin-fixed, paraffin-embedded human Esophageal Carcinoma stained with IL-6 Monoclonal Antibody (IL6/1270).

Formalin-fixed, paraffin-embedded human Colon Carcinoma stained with IL-6 Monoclonal Antibody (IL6/1270).

# IL-6 (Interleukin-6) / Interferon beta-2 (Hybridoma Growth Factor) Antibody - With BSA and Azide - Background

IL-6 is a potent lymphoid cell growth factor that stimulates the growth and survivability of certain B-cells and T-cells. It plays a critical role in B-cell differentiation to plasma cells and is a potent growth factor for plasmacytoma and myeloma. IL-6 is produced by a variety of cell types, including monocytes, fibroblasts and endothelial cells. Upon stimulation, macrophages, T, B, mast, and glial cells, eosinophils, keratinocytes and granulocytes also secrete IL-6. It is involved in host defense, acute phase reactions, immune responses, and hematopoiesis.
