|-------------------|------------------------|
| Application       | ,14,3,4,               |
| Primary Accession | <a href="#">P22083</a> |
| Other Accession   | <a href="#">654379</a> |
| Reactivity        | Human, Mouse, Rat      |
| Host              | Rabbit                 |
| Clonality         | Monoclonal             |
| Isotype           | Rabbit / IgG, kappa    |
| Calculated MW     | 59084                  |

**Anti-CD15 / FUT4 (Reed-Sternberg Cell Marker) Antibody - Additional Information****Gene ID** 2526**Other Names**

3 Fucosyl N Acetyl Lactosamine; Alpha (1, 3) Fucosyltransferase; Alpha 13 fucosyltransferase FucT; ELAM Ligand Fucosyltransferase; ELFT; FCT3A; Fuc-TIV; Fucosyltransferase 4 Alpha 1 3 Fucosyltransferase Myeloid Specific; Fucosyltransferase 4; Galactoside 3 L Fucosyltransferase; Lewis X; LeX; SSEA1; Stage Specific Embryonic Antigen 1

**Format**

200ug/ml of Ab purified by Protein A Column. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & Azide at 1.0mg/ml.

**Storage**

Store at 2 to 8°C. Antibody is stable for 24 months.

**Precautions**

Anti-CD15 / FUT4 (Reed-Sternberg Cell Marker) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Anti-CD15 / FUT4 (Reed-Sternberg Cell Marker) Antibody - Protein Information****Name** FUT4 {ECO:0000303|PubMed:29593094}**Function**

[Isoform Short]: Catalyzes alpha(1->3) linkage of fucosyl moiety transferred from GDP-beta-L-fucose to N-acetyl glucosamine (GlcNAc) within type 2 lactosamine (LacNAc, Gal-beta(1->4)GlcNAc) glycan attached to N- or O-linked glycoproteins (PubMed:<a href="http://www.uniprot.org/citations/29593094" target="\_blank">29593094</a>, PubMed:<a href="http://www.uniprot.org/citations/1702034" target="\_blank">1702034</a>, PubMed:<a href="http://www.uniprot.org/citations/1716630" target="\_blank">1716630</a>). Robustly fucosylates nonsialylated distal LacNAc unit of the polylactosamine chain to form Lewis X antigen

(CD15), a glycan determinant known to mediate important cellular functions in development and immunity. Fucosylates with lower efficiency sialylated LacNAc acceptors to form sialyl Lewis X and 6- sulfo sialyl Lewis X determinants that serve as recognition epitopes for C-type lectins (PubMed: <a href="http://www.uniprot.org/citations/29593094" target="\_blank">29593094</a>, PubMed: <a href="http://www.uniprot.org/citations/1716630" target="\_blank">1716630</a>). Together with FUT7 contributes to SELE, SELL and SELP selectin ligand biosynthesis and selectin-dependent lymphocyte homing, leukocyte migration and blood leukocyte homeostasis (By similarity). In a cell type specific manner, may also fucosylate the internal LacNAc unit of the polylactosamine chain to form VIM-2 antigen that serves as recognition epitope for SELE (PubMed: <a href="http://www.uniprot.org/citations/1716630" target="\_blank">1716630</a>, PubMed: <a href="http://www.uniprot.org/citations/11278338" target="\_blank">11278338</a>).

#### **Cellular Location**

Golgi apparatus, Golgi stack membrane; Single- pass type II membrane protein.  
Note=Membrane-bound form in trans cisternae of Golgi

#### **Tissue Location**

[Isoform Short]: Expressed at low levels in bone marrow-derived mesenchymal stem cells.

### **Anti-CD15 / FUT4 (Reed-Sternberg Cell Marker) Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### **Anti-CD15 / FUT4 (Reed-Sternberg Cell Marker) Antibody - Images**

Formalin-fixed, paraffin-embedded human Hodgkin's Lymphoma stained with CD15 Recombinant Rabbit Monoclonal Antibody (FUT4/1478R).

### **Anti-CD15 / FUT4 (Reed-Sternberg Cell Marker) Antibody - Background**

CD15 plays a role in mediating phagocytosis, bactericidal activity, and chemotaxis. It is present on >95% of granulocytes including neutrophils and eosinophils and to a lesser degree on monocytes. In addition, CD15 is expressed in Reed-Sternberg cells and some epithelial cells. CD15 antibody is

very useful in the identification of Hodgkin s disease. CD15 is occasionally expressed in large cell lymphomas of both B and T phenotypes which otherwise have a quite distinct histological appearance.
