

Tead4 antibody - middle region

Rabbit Polyclonal Antibody Catalog # Al10516

Specification

Tead4 antibody - middle region - Product Information

Application WB
Primary Accession Q62296

Other Accession NM 011567, NP 035697

Reactivity Human, Mouse, Rat, Zebrafish, Pig, Horse,

Bovine, Dog

Predicted Human, Mouse, Pig, Chicken, Bovine,

Guinea Pig Rabbit Polyclonal 48kDa KDa

Tead4 antibody - middle region - Additional Information

Gene ID 21679

Alias Symbol ETFR-2, Etfr2, FR-19, TEAD-4, TEF-3, Tcf13r1, Tef3, Tefr, Tefr1a

Other Names

Transcriptional enhancer factor TEF-3, ETF-related factor 2, ETFR-2, TEA domain family member 4, TEAD-4, TEF-1-related factor 1, TEF-1-related factor FR-19, RTEF-1, Tead4, Tcf13r1, Tef3, Tefr1

Format

Host

Clonality
Calculated MW

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

Reconstitution & Storage

Add 50 ul of distilled water. Final anti-Tead4 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

Precautions

Tead4 antibody - middle region is for research use only and not for use in diagnostic or therapeutic procedures.

Tead4 antibody - middle region - Protein Information

Name Tead4

Synonyms Tcf13r1, Tef3, Tefr1

Function

Transcription factor which plays a key role in the Hippo signaling pathway, a pathway involved in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. The core of this pathway is composed of a kinase cascade wherein MST1/MST2, in complex with its

Tel: 858.875.1900 Fax: 858.875.1999

regulatory protein SAV1, phosphorylates and activates LATS1/2 in complex with its regulatory protein MOB1, which in turn phosphorylates and inactivates YAP1 oncoprotein and WWTR1/TAZ. Acts by mediating gene expression of YAP1 and WWTR1/TAZ, thereby regulating cell proliferation, migration and epithelial mesenchymal transition (EMT) induction. Binds specifically and non-cooperatively to the Sph and GT-IIC 'enhansons' (5'-GTGGAATGT-3') and activates transcription. Binds to the M-CAT motif (By similarity). Might play a role in the embryonic development of skeletal muscle.

Cellular Location Nucleus.

Tissue Location

Preferentially expressed in lung and in skeletal muscle

Tead4 antibody - middle region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
