

LARP1 antibody - N-terminal region
Rabbit Polyclonal Antibody
Catalog # AI12097

Specification

LARP1 antibody - N-terminal region - Product Information

Application	WB
Primary Accession	Q6PKG0
Other Accession	NM_033551 , NP_291029
Reactivity	Human, Rabbit
Predicted	Human, Rabbit
Host	Rabbit
Clonality	Polyclonal
Calculated MW	123kDa KDa

LARP1 antibody - N-terminal region - Additional Information

Gene ID 23367

Alias Symbol [KIAA0731](#), LARP, MGC19556

Other Names

La-related protein 1, La ribonucleoprotein domain family member 1, LARP1, KIAA0731, LARP

Format

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

Reconstitution & Storage

Add 50 ul of distilled water. Final anti-LARP1 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

Precautions

LARP1 antibody - N-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

LARP1 antibody - N-terminal region - Protein Information

Name LARP1

Synonyms KIAA0731, LARP

Function

RNA-binding protein that regulates the translation of specific target mRNA species downstream of the mTORC1 complex, in function of growth signals and nutrient availability (PubMed:[20430826](http://www.uniprot.org/citations/20430826), PubMed:[23711370](http://www.uniprot.org/citations/23711370), PubMed:[24532714](http://www.uniprot.org/citations/24532714), PubMed:[25940091](http://www.uniprot.org/citations/25940091), PubMed:[28650797](http://www.uniprot.org/citations/28650797))

href="http://www.uniprot.org/citations/28673543" target="_blank">>28673543, PubMed:>29244122). Interacts on the one hand with the 3' poly-A tails that are present in all mRNA molecules, and on the other hand with the 7-methylguanosine cap structure of mRNAs containing a 5' terminal oligopyrimidine (5'TOP) motif, which is present in mRNAs encoding ribosomal proteins and several components of the translation machinery (PubMed:>23711370, PubMed:>25940091, PubMed:>28650797, PubMed:>29244122, PubMed:>26206669, PubMed:>28379136). The interaction with the 5' end of mRNAs containing a 5'TOP motif leads to translational repression by preventing the binding of EIF4G1 (PubMed:>25940091, PubMed:>28650797, PubMed:>29244122, PubMed:>28379136). When mTORC1 is activated, LARP1 is phosphorylated and dissociates from the 5' untranslated region (UTR) of mRNA (PubMed:>25940091, PubMed:>28650797). Does not prevent binding of EIF4G1 to mRNAs that lack a 5'TOP motif (PubMed:>28379136). Interacts with the free 40S ribosome subunit and with ribosomes, both monosomes and polysomes (PubMed:>20430826, PubMed:>24532714, PubMed:>25940091, PubMed:>28673543). Under normal nutrient availability, interacts primarily with the 3' untranslated region (UTR) of mRNAs encoding ribosomal proteins and increases protein synthesis (PubMed:>23711370, PubMed:>28650797). Associates with actively translating ribosomes and stimulates translation of mRNAs containing a 5'TOP motif, thereby regulating protein synthesis, and as a consequence, cell growth and proliferation (PubMed:>20430826, PubMed:>24532714). Stabilizes mRNAs species with a 5'TOP motif, which is required to prevent apoptosis (PubMed:>20430826, PubMed:>23711370, PubMed:>25940091, PubMed:>28673543).

Cellular Location

Cytoplasm. Cytoplasmic granule Note=Colocalizes with RPTOR and PABPC1 in cytoplasmic granules that resemble stress granules.

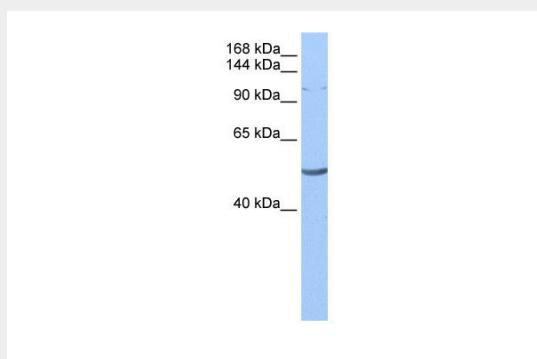

LARP1 antibody - N-terminal region - Protocols

Provided below are standard protocols that you may find useful for product applications.

LARP1 antibody - N-terminal region - Images

WB Suggested Anti-LARP1 Antibody Titration: 0.2-1 µg/ml

Positive Control: 721_B cell lysate

LARP1 is strongly supported by BioGPS gene expression data to be expressed in Human 721_B cells
