

C14orf129 antibody - middle region
Rabbit Polyclonal Antibody
Catalog # AI14031**Specification**

C14orf129 antibody - middle region - Product Information

Application	WB
Primary Accession	O9P0R6
Other Accession	NM_016472 , NP_057556
Reactivity	Human, Mouse, Rat, Rabbit, Horse, Bovine, Guinea Pig, Dog
Predicted	Rabbit, Pig, Horse, Guinea Pig
Host	Rabbit
Clonality	Polyclonal
Calculated MW	16kDa kDa

C14orf129 antibody - middle region - Additional Information**Gene ID** 51527**Alias Symbol** GSKIP, HSPC210, MGC4945, C14orf129
Other Names
GSK3-beta interaction protein, GSKIP, GSKIP, C14orf129**Format**

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

Reconstitution & Storage

Add 50 ul of distilled water. Final anti-C14orf129 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

Precautions

C14orf129 antibody - middle region is for research use only and not for use in diagnostic or therapeutic procedures.

C14orf129 antibody - middle region - Protein Information**Name** GSKIP {ECO:0000303|PubMed:16981698, ECO:0000312|HGNC:HGNC:20343}**Function**

A-kinase anchoring protein for GSK3B and PKA that regulates or facilitates their kinase activity towards their targets (PubMed: [16981698](http://www.uniprot.org/citations/16981698), PubMed: [25920809](http://www.uniprot.org/citations/25920809), PubMed: [27484798](http://www.uniprot.org/citations/27484798)). The ternary complex enhances Wnt-induced signaling by facilitating the GSK3B- and PKA-induced phosphorylation of beta-catenin leading to beta-catenin degradation and stabilization respectively (PubMed: [16981698](http://www.uniprot.org/citations/16981698), PubMed: [25920809](http://www.uniprot.org/citations/25920809), PubMed: [27484798](http://www.uniprot.org/citations/27484798)).

<http://www.uniprot.org/citations/27484798> target="_blank">27484798). Upon cAMP activation, the ternary complex contributes to neuroprotection against oxidative stress-induced apoptosis by facilitating the PKA-induced phosphorylation of DML1 and PKA-induced inactivation of GSK3B (PubMed:25920809). During neurite outgrowth promotes neuron proliferation; while increases beta-catenin-induced transcriptional activity through GSK3B kinase activity inhibition, reduces N-cadherin level to promote cell cycle progression (PubMed:19830702).

Cellular Location

Cytoplasm. Nucleus

Tissue Location

Detected in heart, brain, placenta, liver, skeletal muscle, kidney, testis, lung and pancreas

C14orf129 antibody - middle region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

C14orf129 antibody - middle region - Images

WB Suggested Anti-C14orf129 Antibody Titration: 0.2-1 µg/ml
Positive Control: HepG2 cell lysate
