**TIMM10 Antibody - middle region - Protein Information****Name** TIMM10**Synonyms** TIM10**Function**

Mitochondrial intermembrane chaperone that participates in the import and insertion of multi-pass transmembrane proteins into the mitochondrial inner membrane. May also be required for the transfer of beta-barrel precursors from the TOM complex to the sorting and assembly machinery (SAM complex) of the outer membrane. Acts as a chaperone-like protein that protects the hydrophobic precursors from aggregation and guide them through the mitochondrial

intermembrane space.

#### Cellular Location

Mitochondrion inner membrane; Peripheral membrane protein; Intermembrane side

#### Tissue Location

Ubiquitous, with highest expression in heart, kidney, liver and skeletal muscle.
