

CD6 Antibody - C-terminal region
Rabbit Polyclonal Antibody
Catalog # AI16097**Specification**

CD6 Antibody - C-terminal region - Product Information

Application	WB
Primary Accession	P30203
Other Accession	NP_006716
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	73kDa KDa

CD6 Antibody - C-terminal region - Additional Information**Gene ID 923**

Alias Symbol **CD6,**
Other Names
T-cell differentiation antigen CD6, T12, TP120, CD6, CD6

Format

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

Reconstitution & Storage

Add 50 μ l of distilled water. Final Anti-CD6 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at -20°C. Avoid repeat freeze-thaw cycles.

Precautions

CD6 Antibody - C-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

CD6 Antibody - C-terminal region - Protein Information

Name CD6 ([HGNC:1691](#))

Function

Cell adhesion molecule that mediates cell-cell contacts and regulates T-cell responses via its interaction with ALCAM/CD166 (PubMed: [15048703](http://www.uniprot.org/citations/15048703), PubMed: [15294938](http://www.uniprot.org/citations/15294938), PubMed: [16352806](http://www.uniprot.org/citations/16352806), PubMed: [16914752](http://www.uniprot.org/citations/16914752), PubMed: [24584089](http://www.uniprot.org/citations/24584089), PubMed: [24945728](http://www.uniprot.org/citations/24945728)). Contributes to signaling cascades triggered by activation of the TCR/CD3 complex (PubMed: [24584089](http://www.uniprot.org/citations/24584089)). Functions as a costimulatory molecule; promotes T-cell

activation and proliferation (PubMed:15294938, PubMed:16352806, PubMed:16914752). Contributes to the formation and maturation of the immunological synapse (PubMed:15294938, PubMed:16352806). Functions as a calcium- dependent pattern receptor that binds and aggregates both Gram-positive and Gram-negative bacteria. Binds both lipopolysaccharide (LPS) from Gram-negative bacteria and lipoteichoic acid from Gram-positive bacteria (PubMed:17601777). LPS binding leads to the activation of signaling cascades and down-stream MAP kinases (PubMed:17601777). Mediates activation of the inflammatory response and the secretion of pro-inflammatory cytokines in response to LPS (PubMed:17601777).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Detected at the immunological synapse, i.e, at the contact zone between antigen-presenting dendritic cells and T-cells (PubMed:15294938, PubMed:16352806). Colocalizes with the TCR/CD3 complex at the immunological synapse (PubMed:15294938)

Tissue Location

Detected on thymocytes (PubMed:15294938). Detected on peripheral blood T-cells (PubMed:15048703, PubMed:16352806) Detected on natural killer (NK) cells (PubMed:16352806). Soluble CD6 is detected in blood serum (at protein level) (PubMed:17601777). Detected in spleen, thymus, appendix, lymph node and peripheral blood leukocytes (PubMed:9013954). Expressed by thymocytes, mature T-cells, a subset of B-cells known as B-1 cells, and by some cells in the brain

CD6 Antibody - C-terminal region - Protocols

Provided below are standard protocols that you may find useful for product applications.

CD6 Antibody - C-terminal region - Images

Host: Rabbit
Target Name: CD6
Sample Tissue: 721_B Whole Cell lysates
Antibody Dilution: 1.0µg/ml

CD6 Antibody - C-terminal region - Background

Involved in cell adhesion. Binds to CD166.
