

HTR6 / 5-HT6 Receptor Antibody (C-Terminus)

Rabbit Polyclonal Antibody Catalog # ALS10141

Specification

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) - Product Information

Application IHC
Primary Accession P50406
Reactivity Human
Host Rabbit
Clonality Polyclonal
Calculated MW 47kDa KDa

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) - Additional Information

Gene ID 3362

Other Names

5-hydroxytryptamine receptor 6, 5-HT-6, 5-HT6, Serotonin receptor 6, HTR6

Target/Specificity

Human HTR6 / 5-HT6. BLAST analysis of the peptide immunogen showed no homology with other human proteins.

Reconstitution & Storage

Long term: -70°C; Short term: +4°C

Precautions

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) - Protein Information

Name HTR6

Function

This is one of the several different receptors for 5- hydroxytryptamine (serotonin), a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. The activity of this receptor is mediated by G proteins that stimulate adenylate cyclase. It has a high affinity for tricyclic psychotropic drugs (By similarity). Controls pyramidal neurons migration during corticogenesis, through the regulation of CDK5 activity (By similarity). Is an activator of TOR signaling (PubMed:23027611).

Cellular Location

Cell membrane; Multi-pass membrane protein.

Tissue Location

Expressed in several human brain regions, most prominently in the caudate nucleus

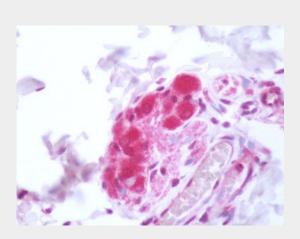

Volume 50 μl

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) - Images

Human Small Intestine: Formalin-Fixed, Paraffin-Embedded (FFPE)

HTR6 / 5-HT6 Receptor Antibody (C-Terminus) - Background

This is one of the several different receptors for 5- hydroxytryptamine (serotonin), a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. The activity of this receptor is mediated by G proteins that stimulate adenylate cyclase. It has a high affinity for tricyclic psychotropic drugs (By similarity). Controls pyramidal neurons migration during corticogenesis, through the regulation of CDK5 activity (By similarity). Is an activator of TOR signaling (PubMed:23027611).
