

DKK1 Antibody (Internal) Rabbit Polyclonal Antibody Catalog # ALS10604

Specification

DKK1 Antibody (Internal) - Product Information

Application Primary Accession Reactivity Host Clonality Calculated MW IHC <u>O94907</u> Human, Monkey, Pig, Horse Rabbit Polyclonal 29kDa KDa

DKK1 Antibody (Internal) - Additional Information

Gene ID 22943

Other Names Dickkopf-related protein 1, Dickkopf-1, Dkk-1, hDkk-1, SK, DKK1

Target/Specificity Human DKK1. BLAST analysis of the peptide immunogen showed no homology with other human proteins.

Reconstitution & Storage Long term: -70°C; Short term: +4°C

Precautions DKK1 Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

DKK1 Antibody (Internal) - Protein Information

Name DKK1

Function

Antagonizes canonical Wnt signaling by inhibiting LRP5/6 interaction with Wnt and by forming a ternary complex with the transmembrane protein KREMEN that promotes internalization of LRP5/6 (PubMed:22000856). DKKs play an important role in vertebrate development, where they locally inhibit Wnt regulated processes such as antero-posterior axial patterning, limb development, somitogenesis and eye formation. In the adult, Dkks are implicated in bone formation and bone disease, cancer and Alzheimer disease (PubMed:17143291). Inhibits the pro-apoptotic function of KREMEN1 in a Wnt-independent manner, and has anti-apoptotic activity (By similarity).

Cellular Location Secreted.

Tissue Location Placenta.

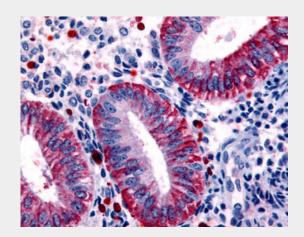

Volume 50 μl

DKK1 Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

DKK1 Antibody (Internal) - Images

Anti-DKK1 antibody ALS10604 IHC of human uterus, endometrium.

DKK1 Antibody (Internal) - Background

Antagonizes canonical Wnt signaling by inhibiting LRP5/6 interaction with Wnt and by forming a ternary complex with the transmembrane protein KREMEN that promotes internalization of LRP5/6. DKKs play an important role in vertebrate development, where they locally inhibit Wnt regulated processes such as antero- posterior axial patterning, limb development, somitogenesis and eye formation. In the adult, Dkks are implicated in bone formation and bone disease, cancer and Alzheimer disease.
