

ADAMTS5 Antibody (C-Terminus)

Rabbit Polyclonal Antibody Catalog # ALS10910

# Specification

# ADAMTS5 Antibody (C-Terminus) - Product Information

Application Primary Accession Reactivity Host Clonality Calculated MW Dilution IHC-P <u>Q9UNA0</u> Human, Monkey Rabbit Polyclonal 102kDa KDa IHC-P~~N/A

## ADAMTS5 Antibody (C-Terminus) - Additional Information

Gene ID 11096

**Other Names** A disintegrin and metalloproteinase with thrombospondin motifs 5, ADAM-TS 5, ADAM-TS5, ADAMTS-5, 3.4.24.-, A disintegrin and metalloproteinase with thrombospondin motifs 11, ADAM-TS 11, ADAMTS-11, ADMP-2, Aggrecanase-2, ADAMTS5, ADAMTS11, ADMP2

**Target/Specificity** Human ADAMTS5. BLAST analysis of the peptide immunogen showed no homology with other human proteins.

**Reconstitution & Storage** Long term: -70°C; Short term: +4°C

**Precautions** ADAMTS5 Antibody (C-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

### ADAMTS5 Antibody (C-Terminus) - Protein Information

Name ADAMTS5

Synonyms ADAMTS11, ADMP2

Function

Metalloproteinase that plays an important role in connective tissue organization, development, inflammation and cell migration. Extracellular matrix (ECM) degrading enzyme that show proteolytic activity toward the hyalectan group of chondroitin sulfate proteoglycans (CSPGs) including ACAN, VCAN, BCAN and NCAN (PubMed:<a

href="http://www.uniprot.org/citations/16133547" target="\_blank">16133547</a>, PubMed:<a href="http://www.uniprot.org/citations/18992360" target="\_blank">18992360</a>). Cleavage within the hyalectans occurs at Glu-Xaa recognition motifs. Plays a role in embryonic development,

including limb and cardiac morphogenesis, and skeletal muscle development through its VCAN remodeling properties. Cleaves VCAN in the pericellular matrix surrounding myoblasts, facilitating myoblast contact and fusion which is required for skeletal muscle development and regeneration (By similarity). Participates in development of brown adipose tissue and browning of white adipose tissue (By similarity). Plays an important role for T-lymphocyte migration from draining lymph nodes following viral infection.

#### **Cellular Location**

Secreted, extracellular space, extracellular matrix

#### **Tissue Location**

Expressed at low level in placenta primarily but also detected in heart and brain, cervix, uterus, bladder, esophagus, rib cartilage, chondroblastoma, fibrous tissue and a joint capsule from an arthritic patient

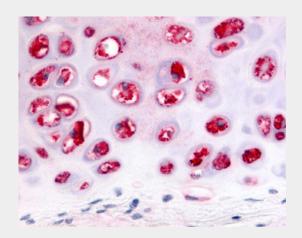

Volume 50 μl

### ADAMTS5 Antibody (C-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

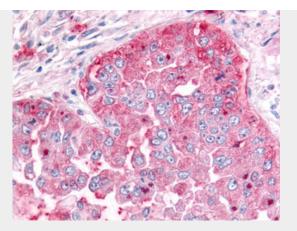

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

### ADAMTS5 Antibody (C-Terminus) - Images

Anti-ADAMTS5 antibody ALS10910 IHC of human cartilage.

Anti-ADAMTS5 antibody IHC of human Lung, Non-Small Cell Carcinoma.

# ADAMTS5 Antibody (C-Terminus) - Background

Cleaves aggrecan, a cartilage proteoglycan, and may be involved in its turnover. May play an important role in the destruction of aggrecan in arthritic diseases. May play a role in proteolytic processing mostly during the peri-implantation period.
