

ALB / Serum Albumin Antibody (Biotin)
Rabbit Polyclonal Antibody
Catalog # ALS11297**Specification****ALB / Serum Albumin Antibody (Biotin) - Product Information**

Application	IHC
Primary Accession	P02768
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	69kDa KDa

ALB / Serum Albumin Antibody (Biotin) - Additional Information**Gene ID** 213**Other Names**

Serum albumin, ALB

Target/Specificity

Human Serum Albumin.

Reconstitution & Storage

+4°C or -20°C, Avoid repeated freezing and thawing.

Precautions

ALB / Serum Albumin Antibody (Biotin) is for research use only and not for use in diagnostic or therapeutic procedures.

ALB / Serum Albumin Antibody (Biotin) - Protein Information**Name** ALB**Function**

Binds water, Ca(2+), Na(+), K(+), fatty acids, hormones, bilirubin and drugs (Probable). Its main function is the regulation of the colloidal osmotic pressure of blood (Probable). Major zinc transporter in plasma, typically binds about 80% of all plasma zinc (PubMed:19021548). Major calcium and magnesium transporter in plasma, binds approximately 45% of circulating calcium and magnesium in plasma (By similarity). Potentially has more than two calcium-binding sites and might additionally bind calcium in a non-specific manner (By similarity). The shared binding site between zinc and calcium at residue Asp-273 suggests a crosstalk between zinc and calcium transport in the blood (By similarity). The rank order of affinity is zinc > calcium > magnesium (By similarity). Binds to the bacterial siderophore enterobactin and inhibits enterobactin-mediated iron uptake of E.coli from ferric transferrin, and may thereby limit the utilization of iron and growth of enteric bacteria such as E.coli (PubMed:6234017). Does not prevent iron uptake by the bacterial siderophore

aerobactin (PubMed:6234017).

Cellular Location

Secreted.

Tissue Location

Plasma.

Volume

50 µl

ALB / Serum Albumin Antibody (Biotin) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Anti-Serum Albumin antibody IHC of human liver.

ALB / Serum Albumin Antibody (Biotin) - Background

Serum albumin, the main protein of plasma, has a good binding capacity for water, Ca²⁺, Na⁺, K⁺, fatty acids, hormones, bilirubin and drugs. Its main function is the regulation of the colloidal osmotic pressure of blood. Major zinc transporter in plasma, typically binds about 80% of all plasma zinc.
