

IL21 Antibody (Internal)

Rabbit Polyclonal Antibody Catalog # ALS11691

Specification

IL21 Antibody (Internal) - Product Information

Application
Primary Accession
Reactivity
Host
Clonality
Calculated MW
Dilution

WB, IHC-P
O9HBE4
Human
Rabbit
Polyclonal
18kDa KDa
WB~~1:1000
IHC-P~~N/A

IL21 Antibody (Internal) - Additional Information

Gene ID 59067

Other Names

Interleukin-21, IL-21, Za11, IL21

Target/Specificity

synthetic peptide corresponding to 15 amino acids near the center of human IL-21 precursor

Reconstitution & Storage

Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles. Store undiluted.

Precautions

IL21 Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

IL21 Antibody (Internal) - Protein Information

Name IL21 (HGNC:6005)

Function

Cytokine with immunoregulatory activity. May promote the transition between innate and adaptive immunity. Induces the production of IgG(1) and IgG(3) in B-cells (By similarity). Implicated in the generation and maintenance of T follicular helper (Tfh) cells and the formation of germinal-centers. Together with IL6, control the early generation of Tfh cells and are critical for an effective antibody response to acute viral infection (By similarity). May play a role in proliferation and maturation of natural killer (NK) cells in synergy with IL15. May regulate proliferation of mature B- and T-cells in response to activating stimuli. In synergy with IL15 and IL18 stimulates interferon gamma production in T-cells and NK cells (PubMed: <a href="https://www.upinret.org/citations/11081504" target="https://www.upinret.org/citations/11081504" targe

href="http://www.uniprot.org/citations/11081504" target="_blank">11081504, PubMed:15178704). During T-cell mediated immune response may inhibit dendritic cells (DC) activation and maturation (By

similarity).

Cellular Location Secreted.

Tissue Location

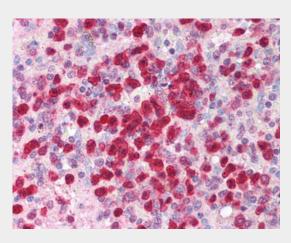

Expressed in activated CD4-positive T-cells but not in CD8-positive T-cells, B-cells, or monocytes

IL21 Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

IL21 Antibody (Internal) - Images

Anti-IL21 antibody IHC of human spleen.

IL21 Antibody (Internal) - Background

Cytokine with immunoregulatory activity. May promote the transition between innate and adaptive immunity. Induces the production of IgG(1) and IgG(3) in B-cells (By similarity). May play a role in proliferation and maturation of natural killer (NK) cells in synergy with IL15. May regulate proliferation of mature B- and T-cells in response to activating stimuli. In synergy with IL15 and IL18 stimulates interferon gamma production in T-cells and NK cells. During T-cell mediated immune response may inhibit dendritic cells (DC) activation and maturation.
