

## **MICA Antibody (C-Terminus)**

Rabbit Polyclonal Antibody Catalog # ALS11697

### **Specification**

## MICA Antibody (C-Terminus) - Product Information

Application IHC
Primary Accession Q29983

Reactivity Human, Mouse

Host Rabbit
Clonality Polyclonal
Calculated MW 43kDa KDa

### MICA Antibody (C-Terminus) - Additional Information

Gene ID 100507436

#### **Other Names**

MHC class I polypeptide-related sequence A, MIC-A, MICA {ECO:0000312|EMBL:CAI41907.1}

### Target/Specificity

a 16 amino acid peptide from near the carboxy terminus of human MICA

#### **Reconstitution & Storage**

Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles. Store undiluted.

#### **Precautions**

MICA Antibody (C-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

## MICA Antibody (C-Terminus) - Protein Information

Name MICA {ECO:0000312|EMBL:CAI41907.1}

#### **Function**

Seems to have no role in antigen presentation. Acts as a stress-induced self-antigen that is recognized by gamma delta T-cells. Ligand for the KLRK1/NKG2D receptor. Binding to KLRK1 leads to cell lysis.

#### **Cellular Location**

Cell membrane; Single-pass type I membrane protein. Cytoplasm. Note=Expressed on the cell surface in gastric epithelium, endothelial cells and fibroblasts and in the cytoplasm in keratinocytes and monocytes. Infection with human adenovirus 5 suppresses cell surface expression due to the adenoviral E3-19K protein which causes retention in the endoplasmic reticulum

#### **Tissue Location**

Widely expressed with the exception of the central nervous system where it is absent. Expressed

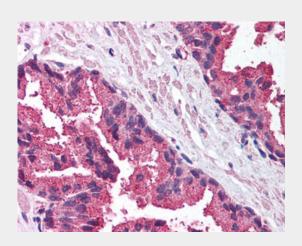

predominantly in gastric epithelium and also in monocytes, keratinocytes, endothelial cells, fibroblasts and in the outer layer of Hassal's corpuscles within the medulla of normal thymus. In skin, expressed mainly in the keratin layers, basal cells, ducts and follicles. Also expressed in many, but not all, epithelial tumors of lung, breast, kidney, ovary, prostate and colon. In thyomas, overexpressed in cortical and medullar epithelial cells. Tumors expressing MICA display increased levels of gamma delta T-cells.

# **MICA Antibody (C-Terminus) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# MICA Antibody (C-Terminus) - Images

Anti-MICA antibody IHC of human prostate.

# MICA Antibody (C-Terminus) - Background

Seems to have no role in antigen presentation. Acts as a stress-induced self-antigen that is recognized by gamma delta T- cells. Ligand for the KLRK1/NKG2D receptor. Binding to KLRK1 leads to cell lysis.
