

**MYD88 Antibody (aa233-248)
Rabbit Polyclonal Antibody
Catalog # ALS11699****Specification**

MYD88 Antibody (aa233-248) - Product Information

Application	IHC
Primary Accession	O99836
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	33kDa KDa

MYD88 Antibody (aa233-248) - Additional Information**Gene ID** 4615**Other Names**

Myeloid differentiation primary response protein MyD88, MYD88

Target/Specificity

peptide corresponding to amino acids 233 to 248 of human MyD88, which differ from those of mouse by two amino acids

Reconstitution & Storage

Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles. Store undiluted.

Precautions

MYD88 Antibody (aa233-248) is for research use only and not for use in diagnostic or therapeutic procedures.

MYD88 Antibody (aa233-248) - Protein Information**Name** MYD88 ([HGNC:7562](#))**Function**

Adapter protein involved in the Toll-like receptor and IL-1 receptor signaling pathway in the innate immune response (PubMed: [15361868](http://www.uniprot.org/citations/15361868), PubMed: [18292575](http://www.uniprot.org/citations/18292575), PubMed: [33718825](http://www.uniprot.org/citations/33718825)). Acts via IRAK1, IRAK2, IRF7 and TRAF6, leading to NF-kappa-B activation, cytokine secretion and the inflammatory response (PubMed: [15361868](http://www.uniprot.org/citations/15361868), PubMed: [24316379](http://www.uniprot.org/citations/24316379), PubMed: [19506249](http://www.uniprot.org/citations/19506249)). Increases IL-8 transcription (PubMed: [9013863](http://www.uniprot.org/citations/9013863)). Involved in IL-18-mediated signaling pathway. Activates IRF1 resulting in its rapid migration into the nucleus to mediate an efficient induction of IFN-beta,

NOS2/INOS, and IL12A genes. Upon TLR8 activation by GU-rich single-stranded RNA (GU-rich RNA) derived from viruses such as SARS-CoV-2, SARS-CoV and HIV-1, induces IL1B release through NLRP3 inflammasome activation (PubMed:33718825). MyD88-mediated signaling in intestinal epithelial cells is crucial for maintenance of gut homeostasis and controls the expression of the antimicrobial lectin REG3G in the small intestine (By similarity).
