

### RNF216 / TRIAD3 Antibody (N-Terminus)

Rabbit Polyclonal Antibody Catalog # ALS11737

## **Specification**

### RNF216 / TRIAD3 Antibody (N-Terminus) - Product Information

Application IHC
Primary Accession Q9NWF9
Reactivity Human, Mouse
Host Rabbit
Clonality Polyclonal
Calculated MW 99kDa KDa

### RNF216 / TRIAD3 Antibody (N-Terminus) - Additional Information

## **Gene ID** 54476

#### **Other Names**

E3 ubiquitin-protein ligase RNF216, 6.3.2.-, RING finger protein 216, Triad domain-containing protein 3, Ubiquitin-conjugating enzyme 7-interacting protein 1, Zinc finger protein inhibiting NF-kappa-B, RNF216, TRIAD3, UBCE7IP1, ZIN

# **Target/Specificity**

peptide corresponding to 15 amino acids near the amino-terminus of mouse TRIAD3A

#### **Reconstitution & Storage**

Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles. Store undiluted.

#### **Precautions**

RNF216 / TRIAD3 Antibody (N-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

### RNF216 / TRIAD3 Antibody (N-Terminus) - Protein Information

### Name RNF216

Synonyms TRIAD3, UBCE7IP1, ZIN

### **Function**

[Isoform 1]: E3 ubiquitin ligase which accepts ubiquitin from specific E2 ubiquitin-conjugating enzymes, and then transfers it to substrates promoting their ubiquitination (PubMed:<a href="http://www.uniprot.org/citations/34998453" target="\_blank">34998453</a>). Plays a role in the regulation of antiviral responses by promoting the degradation of TRAF3, TLR4 and TLR9 (PubMed:<a href="http://www.uniprot.org/citations/15107846" target="\_blank">15107846</a>, PubMed:<a href="http://www.uniprot.org/citations/19893624" target="\_blank">19893624</a>). In turn, down-regulates NF-kappa-B and IRF3 activation as well as beta interferon production. Participates also in the regulation of autophagy by ubiquitinating BECN1 leading to its degradation and autophagy inhibition (PubMed:<a href="http://www.uniprot.org/citations/25484083"

target="\_blank">25484083</a>). Plays a role in ARC-dependent synaptic plasticity by mediating ARC ubiquitination resulting in its rapid proteasomal degradation (PubMed:<a href="http://www.uniprot.org/citations/24945773" target="\_blank">24945773</a>). Plays aso an essential role in spermatogenesis and male fertility (By similarity). Mechanistically, regulates meiosis by promoting the degradation of PRKACB through the ubiquitin-mediated lysosome pathway (By similarity). Modulates the gonadotropin-releasing hormone signal pathway by affecting the stability of STAU2 that is required for the microtubule-dependent transport of neuronal RNA from the cell body to the dendrite (By similarity).

### **Cellular Location**

Cytoplasm. Cytoplasmic vesicle, clathrin-coated vesicle

#### **Tissue Location**

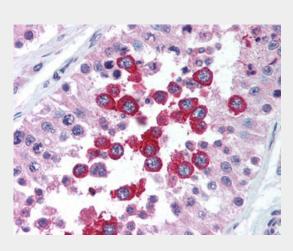

Ubiquitous, with the highest levels of expression in testis and peripheral blood leukocytes

## RNF216 / TRIAD3 Antibody (N-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

### RNF216 / TRIAD3 Antibody (N-Terminus) - Images

Anti-RNF216 / TRIAD3 antibody IHC of human testis.

### RNF216 / TRIAD3 Antibody (N-Terminus) - Background

Isoform 1 acts as an E3 ubiquitin ligase, which accepts ubiquitin from specific E2 ubiquitin-conjugating enzymes, and then transfers it to substrates promoting their degradation by the proteasome. Promotes degradation of TRAF3, TLR4 and TLR9. Contributes to the regulation of antiviral responses. Down- regulates activation of NF-kappa-B, IRF3 activation and IFNB production. Isoform 3/ZIN inhibits TNF and IL-1 mediated activation of NF-kappa-B. Promotes TNF and RIP mediated apoptosis.
