**LRP1 / CD91 Antibody (clone 5A6) - Protein Information****Name** LRP1 ([HGNC:6692](#))**Synonyms** A2MR, APR**Function**

Endocytic receptor involved in endocytosis and in phagocytosis of apoptotic cells (PubMed:<a href="http://www.uniprot.org/citations/11907044" target="\_blank">11907044</a>, PubMed:<a href="http://www.uniprot.org/citations/12713657" target="\_blank">12713657</a>). Required for early embryonic development (By similarity). Involved in cellular lipid homeostasis. Involved in the plasma clearance of chylomicron remnants and activated LRPAP1 (alpha 2-macroglobulin), as well as the local metabolism of complexes between plasminogen activators and their endogenous inhibitors. Acts as an LRPAP1 alpha-2- macroglobulin receptor (PubMed:<a

Acts as TAU/MAPT receptor and controls the endocytosis of TAU/MAPT as well as its subsequent spread (PubMed:<a href="http://www.uniprot.org/citations/32296178" target="\_blank">32296178</a>). May modulate cellular events, such as APP metabolism, kinase-dependent intracellular signaling, neuronal calcium signaling as well as neurotransmission (PubMed:<a href="http://www.uniprot.org/citations/12888553" target="\_blank">12888553</a>).

#### **Cellular Location**
