

CD95 / FAS Antibody (clone LT95) Mouse Monoclonal Antibody Catalog # ALS12492

### Specification

# CD95 / FAS Antibody (clone LT95) - Product Information

Application Primary Accession Reactivity Host Clonality Calculated MW Dilution IHC-P, FC P25445 Human Mouse Monoclonal 38kDa KDa IHC-P~~N/A FC~~1:10~50

### CD95 / FAS Antibody (clone LT95) - Additional Information

Gene ID 355

**Other Names** 

Tumor necrosis factor receptor superfamily member 6, Apo-1 antigen, Apoptosis-mediating surface antigen FAS, FASLG receptor, CD95, FAS, APT1, FAS1, TNFRSF6

Target/Specificity

Reacts with CD95 (Fas/APO-1), a 46 kD single chain type I glycoprotein of the tumor necrosis factor/nerve growth factor (TNF/NGF) receptor superfamily, expressed on a variety of normal and neoplastic cells. It seems that the antibody LT95 does not in ...

**Reconstitution & Storage** 

+4°C or -20°C, Avoid repeated freezing and thawing.

**Precautions** CD95 / FAS Antibody (clone LT95) is for research use only and not for use in diagnostic or therapeutic procedures.

### CD95 / FAS Antibody (clone LT95) - Protein Information

Name FAS

Synonyms APT1, FAS1, TNFRSF6

#### Function

Receptor for TNFSF6/FASLG. The adapter molecule FADD recruits caspase CASP8 to the activated receptor. The resulting death-inducing signaling complex (DISC) performs CASP8 proteolytic activation which initiates the subsequent cascade of caspases (aspartate-specific cysteine proteases) mediating apoptosis. FAS-mediated apoptosis may have a role in the induction of peripheral tolerance, in the antigen- stimulated suicide of mature T-cells, or both. The secreted isoforms 2 to 6 block apoptosis (in vitro).

### **Cellular Location**

[Isoform 1]: Cell membrane; Single-pass type I membrane protein. Membrane raft [Isoform 3]: Secreted. [Isoform 5]: Secreted.

#### Tissue Location

Isoform 1 and isoform 6 are expressed at equal levels in resting peripheral blood mononuclear cells. After activation there is an increase in isoform 1 and decrease in the levels of isoform 6.

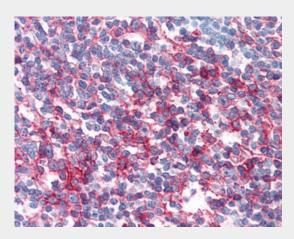

Volume 50 μl

# CD95 / FAS Antibody (clone LT95) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

CD95 / FAS Antibody (clone LT95) - Images

Anti-FAS antibody IHC of human tonsil.

# CD95 / FAS Antibody (clone LT95) - Background

Receptor for TNFSF6/FASLG. The adapter molecule FADD recruits caspase-8 to the activated receptor. The resulting death- inducing signaling complex (DISC) performs caspase-8 proteolytic activation which initiates the subsequent cascade of caspases (aspartate-specific cysteine proteases) mediating apoptosis. FAS- mediated apoptosis may have a role in the induction of peripheral tolerance, in the antigen-stimulated suicide of mature T-cells, or both. The secreted isoforms 2 to 6 block apoptosis (in vitro).
