

CD34 Antibody (FITC) Mouse Monoclonal Antibody Catalog # ALS12754

## Specification

# **CD34 Antibody (FITC) - Product Information**

Application	IHC
Primary Accession	<u>P28906</u>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	41kDa KDa

## **CD34 Antibody (FITC) - Additional Information**

Gene ID 947

**Other Names** Hematopoietic progenitor cell antigen CD34, CD34, CD34

**Target/Specificity** Recognizes human CD34 Class III epitope which is resistant to neuraminidase, chymopapain and glycoprotease.

**Reconstitution & Storage** Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles.

**Precautions** CD34 Antibody (FITC) is for research use only and not for use in diagnostic or therapeutic procedures.

### CD34 Antibody (FITC) - Protein Information

Name CD34

#### Function

Possible adhesion molecule with a role in early hematopoiesis by mediating the attachment of stem cells to the bone marrow extracellular matrix or directly to stromal cells. Could act as a scaffold for the attachment of lineage specific glycans, allowing stem cells to bind to lectins expressed by stromal cells or other marrow components. Presents carbohydrate ligands to selectins.

Cellular Location

Membrane; Single-pass type I membrane protein.

# **Tissue Location**

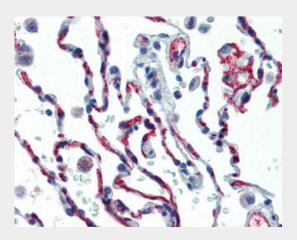

Selectively expressed on hematopoietic progenitor cells and the small vessel endothelium of a variety of tissues

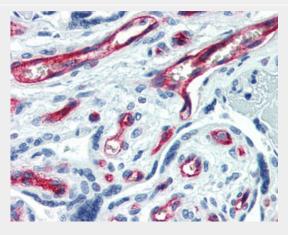

# **CD34 Antibody (FITC) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
- CD34 Antibody (FITC) Images

Anti-CD34 antibody IHC of human lung.

Anti-CD34 antibody IHC of human placenta.

# CD34 Antibody (FITC) - Background

Possible adhesion molecule with a role in early hematopoiesis by mediating the attachment of stem cells to the bone marrow extracellular matrix or directly to stromal cells. Could act as a scaffold for the attachment of lineage specific glycans, allowing stem cells to bind to lectins expressed by stromal cells or other marrow components. Presents carbohydrate ligands to selectins.
