

AR / Androgen Receptor Antibody (N-Terminus)

Rabbit Polyclonal Antibody Catalog # ALS12767

Specification

AR / Androgen Receptor Antibody (N-Terminus) - Product Information

Application IHC Primary Accession P10275

Reactivity Human, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Calculated MW 99kDa KDa

AR / Androgen Receptor Antibody (N-Terminus) - Additional Information

Gene ID 367

Other Names

Androgen receptor, Dihydrotestosterone receptor, Nuclear receptor subfamily 3 group C member 4, AR, DHTR, NR3C4

Reconstitution & Storage

Store at 2°C to 8°C degrees. Do not freeze.

Precautions

AR / Androgen Receptor Antibody (N-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

AR / Androgen Receptor Antibody (N-Terminus) - Protein Information

Name AR

Synonyms DHTR, NR3C4

Function

Steroid hormone receptors are ligand-activated transcription factors that regulate eukaryotic gene expression and affect cellular proliferation and differentiation in target tissues (PubMed:19022849). Transcription factor activity is modulated by bound coactivator and corepressor proteins like ZBTB7A that recruits NCOR1 and NCOR2 to the androgen response elements/ARE on target genes, negatively regulating androgen receptor signaling and androgen-induced cell proliferation (PubMed:20812024). Transcription activation is also down-regulated by NROB2. Activated, but not phosphorylated, by HIPK3 and ZIPK/DAPK3.

Cellular Location

Nucleus. Cytoplasm Note=Detected at the promoter of target genes (PubMed:25091737) Predominantly cytoplasmic in unligated form but translocates to the nucleus upon ligand-binding.

Can also translocate to the nucleus in unligated form in the presence of RACK1.

Tissue Location

[Isoform 2]: Mainly expressed in heart and skeletal muscle.

Volume 250 μl

AR / Androgen Receptor Antibody (N-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

AR / Androgen Receptor Antibody (N-Terminus) - Images

Anti-Androgen Receptor antibody IHC of human prostate.

AR / Androgen Receptor Antibody (N-Terminus) - Background

Steroid hormone receptors are ligand-activated transcription factors that regulate eukaryotic gene expression and affect cellular proliferation and differentiation in target tissues. Transcription factor activity is modulated by bound coactivator and corepressor proteins. Transcription activation is down-regulated by NROB2. Activated, but not phosphorylated, by HIPK3 and ZIPK/DAPK3.
