

ALCAM / CD166 Antibody (clone 10F1G12)
Mouse Monoclonal Antibody
Catalog # ALS13030

Specification

ALCAM / CD166 Antibody (clone 10F1G12) - Product Information

Application	IHC
Primary Accession	Q13740
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	65kDa KDa

ALCAM / CD166 Antibody (clone 10F1G12) - Additional Information

Gene ID 214

Other Names

CD166 antigen, Activated leukocyte cell adhesion molecule, CD166, ALCAM, MEMD

Target/Specificity

Human ALCAM

Reconstitution & Storage

Long term: -20°C; Short term: +4°C. Avoid repeat freeze-thaw cycles.

Precautions

ALCAM / CD166 Antibody (clone 10F1G12) is for research use only and not for use in diagnostic or therapeutic procedures.

ALCAM / CD166 Antibody (clone 10F1G12) - Protein Information

Name ALCAM

Synonyms MEMD {ECO:0000303|PubMed:9502422}

Function

Cell adhesion molecule that mediates both heterotypic cell-cell contacts via its interaction with CD6, as well as homotypic cell-cell contacts (PubMed:7760007, PubMed:15496415, PubMed:15048703, PubMed:16352806, PubMed:23169771, PubMed:24945728). Promotes T-cell activation and proliferation via its interactions with CD6 (PubMed:15048703, PubMed:16352806, PubMed:>24945728). Contributes to the formation and maturation of the immunological synapse via its interactions with CD6 (PubMed:>15294938, PubMed:>16352806). Mediates homotypic interactions with cells that express ALCAM (PubMed:>15496415, PubMed:>16352806). Acts as a ligand for the LILRB4 receptor, enhancing LILRB4-mediated inhibition of T cell proliferation (PubMed:>29263213). Required for normal hematopoietic stem cell engraftment in the bone marrow (PubMed:>24740813). Mediates attachment of dendritic cells onto endothelial cells via homotypic interaction (PubMed:>23169771). Inhibits endothelial cell migration and promotes endothelial tube formation via homotypic interactions (PubMed:>15496415, PubMed:>23169771). Required for normal organization of the lymph vessel network. Required for normal hematopoietic stem cell engraftment in the bone marrow. Plays a role in hematopoiesis; required for normal numbers of hematopoietic stem cells in bone marrow. Promotes in vitro osteoblast proliferation and differentiation (By similarity). Promotes neurite extension, axon growth and axon guidance; axons grow preferentially on surfaces that contain ALCAM. Mediates outgrowth and pathfinding for retinal ganglion cell axons (By similarity).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Cell projection, axon {ECO:0000250|UniProtKB:Q61490}. Cell projection, dendrite {ECO:0000250|UniProtKB:Q61490}. Note=Detected at the immunological synapse, i.e., at the contact zone between antigen-presenting dendritic cells and T-cells (PubMed:15294938, PubMed:16352806). Colocalizes with CD6 and the TCR/CD3 complex at the immunological synapse (PubMed:15294938).

Tissue Location

Detected on hematopoietic stem cells derived from umbilical cord blood (PubMed:24740813). Detected on lymph vessel endothelial cells, skin and tonsil (PubMed:23169771). Detected on peripheral blood monocytes (PubMed:15048703). Detected on monocyte- derived dendritic cells (at protein level) (PubMed:16352806). Detected at low levels in spleen, placenta, liver (PubMed:9502422). Expressed by activated T-cells, B-cells, monocytes and thymic epithelial cells (PubMed:7760007). Isoform 1 and isoform 3 are detected in vein and artery endothelial cells, astrocytes, keratinocytes and artery smooth muscle cells (PubMed:15496415). Expressed by neurons in the brain Restricted expression in tumor cell lines. Detected in highly metastasizing melanoma cell lines (PubMed:9502422)

Volume

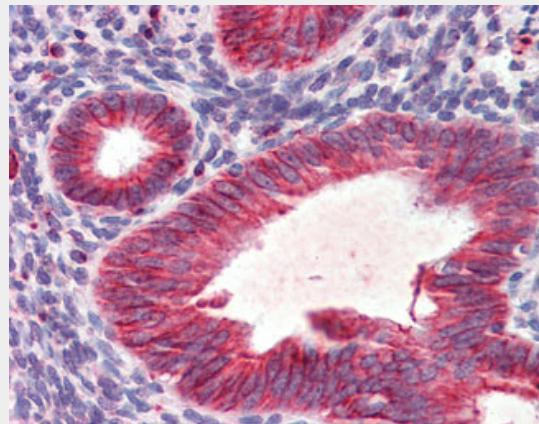

50 µl

ALCAM / CD166 Antibody (clone 10F1G12) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

- [Cell Culture](#)

ALCAM / CD166 Antibody (clone 10F1G12) - Images

Anti-ALCAM / CD166 antibody IHC of human uterus.

ALCAM / CD166 Antibody (clone 10F1G12) - Background

Cell adhesion molecule that binds to CD6. Involved in neurite extension by neurons via heterophilic and homophilic interactions. May play a role in the binding of T- and B-cells to activated leukocytes, as well as in interactions between cells of the nervous system.
