CLDN7 / Claudin 7 Antibody (C-Terminus) - Protein Information**Name** CLDN7**Synonyms** CEPTRL2, CPETRL2**Function**

Plays a major role in tight junction-specific obliteration of the intercellular space.

Cellular Location

Cell membrane; Multi-pass membrane protein. Basolateral cell membrane. Cell junction, tight junction. Note=Co-localizes with EPCAM at the basolateral cell membrane and tight junction

Tissue Location

Expressed in kidney, lung and prostate. Isoform 1 seems to be predominant, except in some normal prostate samples, where isoform 2 is the major form. Down-regulated in breast cancers, including ductal carcinoma in situ (DCIS), lobular carcinoma in situ (LCIS) and invasive ductal carcinoma (IDC) (at protein level), as well as in several cancer cell lines. Loss of expression correlates with histological grade, occurring predominantly in high-grade lesions

Volume
50 µl
