

**DNMT3B Antibody (aa1-50)**  
**Rabbit Polyclonal Antibody**  
**Catalog # ALS14205****Specification**

---

**DNMT3B Antibody (aa1-50) - Product Information**

Application	WB, IHC-P, IF, E
Primary Accession	<a href="#">Q9UBC3</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	96kDa KDa
Dilution	WB~~1:1000 IHC-P~~N/A IF~~1:50~200 E~~N/A

**DNMT3B Antibody (aa1-50) - Additional Information****Gene ID** 1789**Other Names**

DNA (cytosine-5)-methyltransferase 3B, Dnmt3b, 2.1.1.37, DNA methyltransferase HsaIIIB, DNA MTase HsaIIIB, M.HsaIIIB, DNMT3B

**Target/Specificity**

DNMT3B Antibody detects endogenous levels of total DNMT3B protein.

**Reconstitution & Storage**

Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles.

**Precautions**

DNMT3B Antibody (aa1-50) is for research use only and not for use in diagnostic or therapeutic procedures.

**DNMT3B Antibody (aa1-50) - Protein Information****Name** DNMT3B**Function**

Required for genome-wide de novo methylation and is essential for the establishment of DNA methylation patterns during development. DNA methylation is coordinated with methylation of histones. May preferentially methylates nucleosomal DNA within the nucleosome core region. May function as transcriptional co-repressor by associating with CBX4 and independently of DNA methylation. Seems to be involved in gene silencing (By similarity). In association with DNMT1 and via the recruitment of CTCFL/BORIS, involved in activation of BAG1 gene expression by modulating dimethylation of promoter histone H3 at H3K4 and H3K9. Isoforms 4 and 5 are probably not functional due to the deletion of two conserved methyltransferase motifs. Functions as a

transcriptional corepressor by associating with ZHX1. Required for DUX4 silencing in somatic cells (PubMed:<a href="http://www.uniprot.org/citations/27153398" target="\_blank">27153398</a>).

#### Cellular Location

Nucleus

#### Tissue Location

Ubiquitous; highly expressed in fetal liver, heart, kidney, placenta, and at lower levels in spleen, colon, brain, liver, small intestine, lung, peripheral blood mononuclear cells, and skeletal muscle. Isoform 1 is expressed in all tissues except brain, skeletal muscle and PBMC, 3 is ubiquitous, 4 is expressed in all tissues except brain, skeletal muscle, lung and prostate and 5 is detectable only in testis and at very low level in brain and prostate

#### Volume

50 µl

### DNMT3B Antibody (aa1-50) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### DNMT3B Antibody (aa1-50) - Images

Immunofluorescence of HeLa cells, using DNMT3B Antibody.

Western blot of extracts from HT-29 cells, using DNMT3B Antibody.

Anti-DNMT3B antibody IHC of human testis.

#### **DNMT3B Antibody (aa1-50) - Background**

Required for genome-wide de novo methylation and is essential for the establishment of DNA methylation patterns during development. DNA methylation is coordinated with methylation of histones. May preferentially methylates nucleosomal DNA within the nucleosome core region. May function as transcriptional co-repressor by associating with CBX4 and independently of DNA methylation. Seems to be involved in gene silencing (By similarity). In association with DNMT1 and via the recruitment of CTCFL/BORIS, involved in activation of BAG1 gene expression by modulating dimethylation of promoter histone H3 at H3K4 and H3K9. Isoforms 4 and 5 are probably not functional due to the deletion of two conserved methyltransferase motifs. Function as transcriptional corepressor by associating with ZHX1.
