

CANX / Calnexin Antibody (clone 1D4)

Mouse Monoclonal Antibody Catalog # ALS14316

Specification

CANX / Calnexin Antibody (clone 1D4) - Product Information

Application
Primary Accession
Reactivity
Host
Clonality
Calculated MW
Dilution
WB, IHC-P, E
P27824
Human
Mouse
Mouse
Monoclonal
68kDa KDa
WB~~1:1000
IHC-P~~N/A

CANX / Calnexin Antibody (clone 1D4) - Additional Information

Gene ID 821

Other Names

Calnexin, IP90, Major histocompatibility complex class I antigen-binding protein p88, p90, CANX

E~~N/A

Target/Specificity

Human Calnexin

Reconstitution & Storage

Aliquot and store at -20°C or -80°C. Avoid freeze-thaw cycles.

Precautions

CANX / Calnexin Antibody (clone 1D4) is for research use only and not for use in diagnostic or therapeutic procedures.

CANX / Calnexin Antibody (clone 1D4) - Protein Information

Name CANX

Function

Calcium-binding protein that interacts with newly synthesized monoglucosylated glycoproteins in the endoplasmic reticulum. It may act in assisting protein assembly and/or in the retention within the ER of unassembled protein subunits. It seems to play a major role in the quality control apparatus of the ER by the retention of incorrectly folded proteins. Associated with partial T-cell antigen receptor complexes that escape the ER of immature thymocytes, it may function as a signaling complex regulating thymocyte maturation. Additionally it may play a role in receptor-mediated endocytosis at the synapse.

Cellular Location

Endoplasmic reticulum membrane; Single-pass type I membrane protein. Mitochondrion

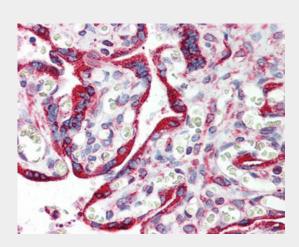

membrane {ECO:0000250|UniProtKB:P24643}; Single-pass type I membrane protein. Melanosome membrane; Single-pass type I membrane protein. Note=Identified by mass spectrometry in melanosome fractions from stage I to stage IV (PubMed:12643545, PubMed:17081065). The palmitoylated form preferentially localizes to the perinuclear rough ER (PubMed:22314232) Localizes to endoplasmic reticulum mitochondria-associated membrane (MAMs) that connect the endoplasmic reticulum and the mitochondria (By similarity). {ECO:0000250|UniProtKB:P24643, ECO:0000269|PubMed:12643545, ECO:0000269|PubMed:17081065, ECO:0000269|PubMed:22314232}

CANX / Calnexin Antibody (clone 1D4) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

CANX / Calnexin Antibody (clone 1D4) - Images

Anti-Calnexin antibody IHC of human placenta.

CANX / Calnexin Antibody (clone 1D4) - Background

Calcium-binding protein that interacts with newly synthesized glycoproteins in the endoplasmic reticulum. It may act in assisting protein assembly and/or in the retention within the ER of unassembled protein subunits. It seems to play a major role in the quality control apparatus of the ER by the retention of incorrectly folded proteins. Associated with partial T-cell antigen receptor complexes that escape the ER of immature thymocytes, it may function as a signaling complex regulating thymocyte maturation. Additionally it may play a role in receptor- mediated endocytosis at the synapse.
