

CREBBP / CREB Binding Protein Antibody (aa2071-2091)
Mouse Monoclonal Antibody
Catalog # ALS14474**Specification**

CREBBP / CREB Binding Protein Antibody (aa2071-2091) - Product Information

Application	IHC
Primary Accession	Q92793
Reactivity	Human, Mouse, Rat, Monkey
Host	Mouse
Clonality	Monoclonal
Calculated MW	265kDa KDa

CREBBP / CREB Binding Protein Antibody (aa2071-2091) - Additional Information**Gene ID** 1387**Other Names**

CREB-binding protein, 2.3.1.48, CREBBP, CBP

Target/Specificity

Recognizes p300 and CBP. p300 and CBP differ by three noncontiguous residues within the 21 amino acid epitope region. A difference that does not detectably affect the reactivity of This antibody. Species cross-reactivity: human, monkey, mink, mouse, ...

Reconstitution & Storage

Long term: -20°C; Short term: +4°C; Avoid freeze-thaw cycles.

Precautions

CREBBP / CREB Binding Protein Antibody (aa2071-2091) is for research use only and not for use in diagnostic or therapeutic procedures.

CREBBP / CREB Binding Protein Antibody (aa2071-2091) - Protein Information**Name** CREBBP ([HGNC:2348](#))**Synonyms** CBP**Function**

Acetylates histones, giving a specific tag for transcriptional activation (PubMed:21131905, PubMed:24616510). Mediates acetylation of histone H3 at 'Lys-18' and 'Lys-27' (H3K18ac and H3K27ac, respectively) (PubMed:21131905). Also acetylates non-histone proteins, like DDX21, FBL, IRF2, MAFG, NCOA3, POLR1E/PAF53 and FOXO1 (PubMed:10490106, PubMed:11154691, PubMed:12738767).

target="_blank">12738767, PubMed:12929931, PubMed:9707565, PubMed:24207024, PubMed:28790157, PubMed:30540930, PubMed:35675826). Binds specifically to phosphorylated CREB and enhances its transcriptional activity toward cAMP-responsive genes. Acts as a coactivator of ALX1. Acts as a circadian transcriptional coactivator which enhances the activity of the circadian transcriptional activators: NPAS2-BMAL1 and CLOCK-BMAL1 heterodimers (PubMed:14645221). Acetylates PCNA; acetylation promotes removal of chromatin-bound PCNA and its degradation during nucleotide excision repair (NER) (PubMed:24939902). Acetylates POLR1E/PAF53, leading to decreased association of RNA polymerase I with the rDNA promoter region and coding region (PubMed:24207024). Acetylates DDX21, thereby inhibiting DDX21 helicase activity (PubMed:28790157). Acetylates FBL, preventing methylation of 'Gln-105' of histone H2A (H2AQ104me) (PubMed:30540930). Functions as a transcriptional coactivator for SMAD4 in the TGF-beta signaling pathway (PubMed:25514493).

Cellular Location

Cytoplasm. Nucleus. Note=Recruited to nuclear bodies by SS18L1/CREST (PubMed:15488321). In the presence of ALX1 relocalizes from the cytoplasm to the nucleus (PubMed:12929931)

CREBBP / CREB Binding Protein Antibody (aa2071-2091) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)

CREBBP / CREB Binding Protein Antibody (aa2071-2091) - Background

Acetylates histones, giving a specific tag for transcriptional activation. Also acetylates non-histone proteins, like NCOA3 and FOXO1. Binds specifically to phosphorylated CREB and enhances its transcriptional activity toward cAMP-responsive genes. Acts as a coactivator of ALX1 in the presence of EP300. Acts as a circadian transcriptional coactivator which enhances the activity of the circadian transcriptional activators: NPAS2- ARNTL/BMAL1 and CLOCK-ARNTL/BMAL1 heterodimers.
