

SFN / Stratifin / 14-3-3 Sigma Antibody (Internal)
Goat Polyclonal Antibody
Catalog # ALS14641**Specification**

SFN / Stratifin / 14-3-3 Sigma Antibody (Internal) - Product Information

Application	WB, IHC
Primary Accession	P31947
Reactivity	Human, Mouse, Rat, Rabbit, Monkey, Pig, Sheep, Horse, Bovine, Dog
Host	Goat
Clonality	Polyclonal
Calculated MW	28kDa KDa

SFN / Stratifin / 14-3-3 Sigma Antibody (Internal) - Additional Information**Gene ID** 2810**Other Names**

14-3-3 protein sigma, Epithelial cell marker protein 1, Stratifin, SFN, HME1

Target/Specificity

Human SFN / 14-3-3 Sigma.

Reconstitution & Storage

Store at -20°C. Minimize freezing and thawing.

Precautions

SFN / Stratifin / 14-3-3 Sigma Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

SFN / Stratifin / 14-3-3 Sigma Antibody (Internal) - Protein Information**Name** SFN**Synonyms** HME1 {ECO:0000303|PubMed:1390337}**Function**

Adapter protein implicated in the regulation of a large spectrum of both general and specialized signaling pathways (PubMed: [15731107](http://www.uniprot.org/citations/15731107), PubMed: [22634725](http://www.uniprot.org/citations/22634725), PubMed: [28202711](http://www.uniprot.org/citations/28202711), PubMed: [37797010](http://www.uniprot.org/citations/37797010)). Binds to a large number of partners, usually by recognition of a phosphoserine or phosphothreonine motif (PubMed: [15731107](http://www.uniprot.org/citations/15731107), PubMed: [22634725](http://www.uniprot.org/citations/22634725), PubMed: [28202711](http://www.uniprot.org/citations/28202711), PubMed: [37797010](http://www.uniprot.org/citations/37797010)).

[37797010](http://www.uniprot.org/citations/37797010)). Binding generally results in the modulation of the activity of the binding partner (PubMed: [15731107](http://www.uniprot.org/citations/15731107), PubMed: [22634725](http://www.uniprot.org/citations/22634725), PubMed: [28202711](http://www.uniprot.org/citations/28202711), PubMed: [37797010](http://www.uniprot.org/citations/37797010)). Promotes cytosolic retention of GBP1 GTPase by binding to phosphorylated GBP1, thereby inhibiting the innate immune response (PubMed: [37797010](http://www.uniprot.org/citations/37797010)). Also acts as a TP53/p53-regulated inhibitor of G2/M progression (PubMed: [9659898](http://www.uniprot.org/citations/9659898)). When bound to KRT17, regulates protein synthesis and epithelial cell growth by stimulating Akt/mTOR pathway (By similarity). May also regulate MDM2 autoubiquitination and degradation and thereby activate p53/TP53 (PubMed: [18382127](http://www.uniprot.org/citations/18382127)).

Cellular Location

Cytoplasm, cytosol. Nucleus {ECO:0000250|UniProtKB:O70456}. Secreted. Note=May be secreted by a non-classical secretory pathway.

Tissue Location

Present mainly in tissues enriched in stratified squamous keratinizing epithelium.

SFN / Stratifin / 14-3-3 Sigma Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
