

SCUBE3 Antibody (Internal) Rabbit Polyclonal Antibody Catalog # ALS15650

### **Specification**

# **SCUBE3 Antibody (Internal) - Product Information**

Application Primary Accession Reactivity Host Clonality Calculated MW Dilution WB, IHC-P, IF <u>Q8IX30</u> Human Rabbit Polyclonal 109kDa KDa WB~~1:1000 IHC-P~~N/A IF~~1:50~200

## SCUBE3 Antibody (Internal) - Additional Information

Gene ID 222663

**Other Names** Signal peptide, CUB and EGF-like domain-containing protein 3, SCUBE3 (<a href="http://www.genenames.org/cgi-bin/gene\_symbol\_report?hgnc\_id=13655" target="\_blank">HGNC:13655</a>)

**Target/Specificity** Human SCUBE3. At least two isoforms of SCUBE3 are known to exist. SCUBE3 antibody is predicted to not cross-react with other SCUBE members.

**Reconstitution & Storage** Long term: -20°C; Short term: +4°C. Avoid repeat freeze-thaw cycles.

**Precautions** SCUBE3 Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

# SCUBE3 Antibody (Internal) - Protein Information

Name SCUBE3 (<u>HGNC:13655</u>)

#### Function

Is a positive regulator of the BMP signaling pathway, required for proper chondrogenesis, osteogenesis and skeletal development. It acts as a coreceptor for BMP ligands, particularly BMP2 and BMP4, facilitating their interactions with BMP type I receptors (PubMed:<a href="http://www.uniprot.org/citations/33308444" target="\_blank">33308444</a>). It is required for ligand-induced recruitment of BMP receptors to lipid rafts (By similarity). Binds to TGFBR2 and activates TGFB signaling. In lung cancer cells, could serve as an endogenous autocrine and paracrine ligand of TGFBR2, which could regulate TGFBR2 signaling and hence modulate

epithelial-mesenchymal transition and cancer progression.

**Cellular Location** Secreted. Cell surface

**Tissue Location** 

Highly expressed in osteoblasts. In normal lung, mainly expressed in bronchial epithelial cells. Tends to be up- regulated in lung cancer cells.

### SCUBE3 Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
