

**ITLN1 / Omentin Antibody (aa27-168)**  
**Rabbit Polyclonal Antibody**  
**Catalog # ALS16133**

**Specification**

---

**ITLN1 / Omentin Antibody (aa27-168) - Product Information**

Application	<b>WB, IHC</b>
Primary Accession	<a href="#">Q8WWA0</a>
Reactivity	<b>Human</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>
Calculated MW	<b>35kDa KDa</b>

**ITLN1 / Omentin Antibody (aa27-168) - Additional Information**

**Gene ID** 55600

**Other Names**

Intelectin-1, ITLN-1, Endothelial lectin HL-1, Galactofuranose-binding lectin, Intestinal lactoferrin receptor, Omentin, ITLN1, INTL, ITLN, LFR

**Target/Specificity**

Human ITLN1.

**Reconstitution & Storage**

Store at -20°C for up to one year.

**Precautions**

ITLN1 / Omentin Antibody (aa27-168) is for research use only and not for use in diagnostic or therapeutic procedures.

**ITLN1 / Omentin Antibody (aa27-168) - Protein Information**

**Name** ITLN1

**Synonyms** INTL, ITLN, LFR

**Function**

Lectin that specifically recognizes microbial carbohydrate chains in a calcium-dependent manner (PubMed: [11313366](http://www.uniprot.org/citations/11313366), PubMed: [26148048](http://www.uniprot.org/citations/26148048)). Binds to microbial glycans that contain a terminal acyclic 1,2-diol moiety, including beta-linked D-galactofuranose (beta- Galf), D-phosphoglycerol-modified glycans, D-glycero-D-talo-oct-2-ulosonic acid (KO) and 3-deoxy-D-manno-oct-2-ulosonic acid (KDO) (PubMed: [26148048](http://www.uniprot.org/citations/26148048)). Binds to glycans from Gram-positive and Gram-negative bacteria, including K.pneumoniae, S.pneumoniae, Y.pestis, P.mirabilis and P.vulgaris (PubMed: [26148048](http://www.uniprot.org/citations/26148048)). Does not bind human glycans (PubMed: [26148048](http://www.uniprot.org/citations/26148048)).

<http://www.uniprot.org/citations/26148048> target="\_blank">26148048</a>). Probably plays a role in the defense system against microorganisms (Probable). May function as adipokine that has no effect on basal glucose uptake but enhances insulin-stimulated glucose uptake in adipocytes (PubMed:<a href="http://www.uniprot.org/citations/16531507" target="\_blank">16531507</a>). Increases AKT phosphorylation in the absence and presence of insulin (PubMed:<a href="http://www.uniprot.org/citations/16531507" target="\_blank">16531507</a>). May interact with lactoferrin/LTF and increase its uptake, and may thereby play a role in iron absorption (PubMed:<a href="http://www.uniprot.org/citations/11747454" target="\_blank">11747454</a>, PubMed:<a href="http://www.uniprot.org/citations/23921499" target="\_blank">23921499</a>).

#### Cellular Location

Cell membrane; Lipid-anchor, GPI-anchor. Secreted. Note=Enriched in lipid rafts  
{ECO:0000250|UniProtKB:O88310}

#### Tissue Location

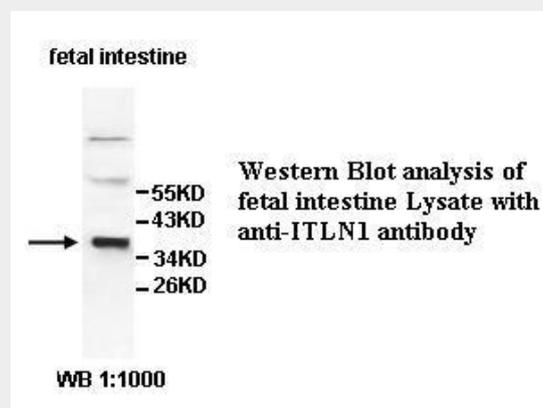

Highly expressed in omental adipose tissue where it is found in stromal vascular cells but not in fat cells but is barely detectable in subcutaneous adipose tissue (at protein level) (PubMed:16531507). Highly expressed in the small intestine. Also found in the heart, testis, colon, salivary gland, skeletal muscle, pancreas and thyroid and, to a lesser degree, in the uterus, spleen, prostate, lymph node and thymus.

#### ITLN1 / Omentin Antibody (aa27-168) - Protocols

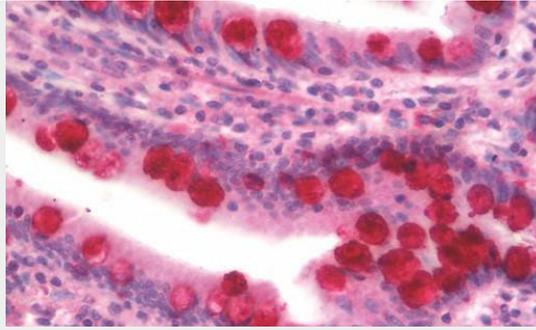

Provided below are standard protocols that you may find useful for product applications.

### **ITLN1 / Omentin Antibody (aa27-168) - Background**

Has no effect on basal glucose uptake but enhances insulin-stimulated glucose uptake in adipocytes. Increases AKT phosphorylation in the absence and presence of insulin. May play a role in the defense system against microorganisms. May specifically recognize carbohydrate chains of pathogens and bacterial components containing galactofuranosyl residues, in a calcium-dependent manner. May be involved in iron metabolism.
