SPON2 / MINDIN Antibody (aa55-104) - Protein Information**Name** SPON2**Synonyms** DIL1**Function**

Cell adhesion protein that promotes adhesion and outgrowth of hippocampal embryonic neurons. Binds directly to bacteria and their components and functions as an opsonin for macrophage phagocytosis of bacteria. Essential in the initiation of the innate immune response and represents a unique pattern-recognition molecule in the ECM for microbial pathogens (By similarity). Binds bacterial lipopolysaccharide (LPS).

Cellular Location

Secreted, extracellular space, extracellular matrix

Tissue Location

Expressed in normal lung tissue but not in lung carcinoma cell lines.
