

ESA / EPCAM Antibody (clone VU1D9)

Mouse Monoclonal Antibody Catalog # ALS16516

Specification

ESA / EPCAM Antibody (clone VU1D9) - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype Calculated MW Dilution WB, IHC-P, ICC, IHC-F, FC <u>P16422</u> <u>4072</u> Human Mouse Monoclonal IgG1 34932 WB~~1:1000 IHC-P~~N/A ICC~~N/A IHC-F~~N/A FC~~1:10~50

ESA / EPCAM Antibody (clone VU1D9) - Additional Information

Gene ID 4072

Other Names

EPCAM, 323/A3, ACSTD1, 17-1A, CD326, EGP, EGP34, Epithelial glycoprotein, GA733-2, HNPCC8, Ep-CAM, ESA, HEGP314, KS 1/4 antigen, KS1/4, KSA, M1S2, MIC18, MK-1, MH99, TROP1, TACST-1, TACSTD1, CD326 antigen, CO-17A, DIAR5, EGP-2, EGP314, EGP40, Epithel ...

Target/Specificity

Reacts with the first EGF repeat in the extracellular domain of Ep-CAM. The epitope is sensitive for reducing agents. Detects Ep-CAM in most simple, pseudostratified and transitional epithelia and in the majority of human carcinomas.

Reconstitution & Storage

PBS containing 0.09% sodium azide. Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles. Store undiluted.

Precautions ESA / EPCAM Antibody (clone VU1D9) is for research use only and not for use in diagnostic or therapeutic procedures.

ESA / EPCAM Antibody (clone VU1D9) - Protein Information

Name EPCAM

Synonyms GA733-2, M1S2, M4S1, MIC18, TACSTD1, TRO

Function

May act as a physical homophilic interaction molecule between intestinal epithelial cells (IECs) and intraepithelial lymphocytes (IELs) at the mucosal epithelium for providing immunological barrier as a first line of defense against mucosal infection. Plays a role in embryonic stem cells proliferation and differentiation. Up-regulates the expression of FABP5, MYC and cyclins A and E.

Cellular Location

Lateral cell membrane; Single-pass type I membrane protein. Cell junction, tight junction. Note=Colocalizes with CLDN7 at the lateral cell membrane and tight junction

Tissue Location

Highly and selectively expressed by undifferentiated rather than differentiated embryonic stem cells (ESC) Levels rapidly diminish as soon as ESC's differentiate (at protein levels). Expressed in almost all epithelial cell membranes but not on mesodermal or neural cell membranes. Found on the surface of adenocarcinoma.

ESA / EPCAM Antibody (clone VU1D9) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

ESA / EPCAM Antibody (clone VU1D9) - Images

Anti-EPCAM antibody IHC of human prostate.

ESA / EPCAM Antibody (clone VU1D9) - Background

May act as a physical homophilic interaction molecule between intestinal epithelial cells (IECs) and intraepithelial lymphocytes (IELs) at the mucosal epithelium for providing immunological barrier as a first line of defense against mucosal infection. Plays a role in embryonic stem cells proliferation and differentiation. Up-regulates the expression of FABP5, MYC and cyclins A and E.
