

APLNR/ Apelin Receptor / APJ Antibody (aa150-200)
Rabbit Polyclonal Antibody
Catalog # ALS16978**Specification**

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) - Product Information

Application	IHC, WB
Primary Accession	P35414
Other Accession	187
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	42660

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) - Additional Information**Gene ID** 187**Other Names**

APLNR, AGTRL1, Angiotensin receptor-like 1, Angiotensin II receptor-like 1, Apelin receptor, APJ, APJ (apelin) receptor, APJR, G protein-coupled receptor APJ, HG11 orphan receptor, HG11, APJ receptor, G-protein coupled receptor APJ

Target/Specificity

Human Apelin Receptor / APJ

Reconstitution & Storage

PBS, pH 7.2, 15 mM sodium azide. Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Precautions

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) is for research use only and not for use in diagnostic or therapeutic procedures.

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) - Protein Information**Name** APLNR**Synonyms** AGTRL1, APJ**Function**

Receptor for apelin receptor early endogenous ligand (APELA) and apelin (APLN) hormones coupled to G proteins that inhibit adenylate cyclase activity (PubMed:11090199, PubMed:25639753, PubMed:28137936). Plays a key role in early development such as gastrulation, blood vessels formation and heart morphogenesis by acting as a receptor for APELA hormone (By similarity). May promote angioblast migration

toward the embryonic midline, i.e. the position of the future vessel formation, during vasculogenesis (By similarity). Promotes sinus venosus (SV)-derived endothelial cells migration into the developing heart to promote coronary blood vessel development (By similarity). Also plays a role in various processes in adults such as regulation of blood vessel formation, blood pressure, heart contractility and heart failure (PubMed:25639753, PubMed:28137936).

Cellular Location

Cell membrane. Note=After exposure to apelin (APLN), internalized from the cell surface into an endosomal recycling compartment, from where it is recycled to the cell membrane (By similarity). After exposure to apelin receptor early endogenous ligand (APELA), internalized from the cell surface into an endosomal recycling compartment, from where it is recycled to the cell membrane (PubMed:25639753) {ECO:0000250|UniProtKB:Q9JHG3, ECO:0000269|PubMed:25639753}

Tissue Location

Expressed in heart, brain, kidney, stomach, spleen, thymus, lung, ovary, small intestine and colon, adipose tissues and pancreas (PubMed:8294032, PubMed:25639753). Expressed in glial cells, astrocytes and neuronal subpopulations (PubMed:8294032). Expressed in embryonic (ESCs) and induced (iPSCs) pluripotent stem cells (PubMed:25639753).

Volume

50 µl

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) - Images

Anti-APLNR/ Apelin Receptor / APJ antibody IHC staining of human small intestine.

Western blot of analysis of APLNR pAb at a 1:500 dilution.

APLNR/ Apelin Receptor / APJ Antibody (aa150-200) - Background

Receptor for apelin coupled to G proteins that inhibit adenylate cyclase activity and plays a role in various processes in adults such as regulation of blood pressure, heart contractility, and heart failure. Also plays a key role in early development such as gastrulation and heart morphogenesis by acting as a receptor for APELA hormone. Alternative coreceptor with CD4 for HIV-1 infection; may be involved in the development of AIDS dementia.
