

NPHS1 / Nephrin Antibody (C-Terminus)
Rabbit Polyclonal Antibody
Catalog # ALS17125**Specification**

NPHS1 / Nephrin Antibody (C-Terminus) - Product Information

Application	IHC
Primary Accession	O60500
Other Accession	4868
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	134742

NPHS1 / Nephrin Antibody (C-Terminus) - Additional Information**Gene ID** 4868**Other Names**

NPHS1, Nephrin, NPHN, CNF

Target/Specificity

Nephrin antibody is human specific.

Reconstitution & Storage

PBS, 0.02% sodium azide. Long term: -20°C; Short term: +4°C. Avoid repeat freeze-thaw cycles.

Precautions

NPHS1 / Nephrin Antibody (C-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

NPHS1 / Nephrin Antibody (C-Terminus) - Protein Information**Name** NPHS1**Synonyms** NPHN**Function**

Seems to play a role in the development or function of the kidney glomerular filtration barrier. Regulates glomerular vascular permeability. May anchor the podocyte slit diaphragm to the actin cytoskeleton. Plays a role in skeletal muscle formation through regulation of myoblast fusion (By similarity).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Predominantly located at podocyte slit diaphragm between podocyte foot processes. Also associated with podocyte apical plasma membrane.

Tissue Location

Specifically expressed in podocytes of kidney glomeruli

NPHS1 / Nephtrin Antibody (C-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

NPHS1 / Nephtrin Antibody (C-Terminus) - Images

Human Kidney: Formalin-Fixed, Paraffin-Embedded (FFPE)

Human Brain, Cerebellum: Formalin-Fixed, Paraffin-Embedded (FFPE)

NPHS1 / Nephtrin Antibody (C-Terminus) - Background

Seems to play a role in the development or function of the kidney glomerular filtration barrier. Regulates glomerular vascular permeability. May anchor the podocyte slit diaphragm to the actin cytoskeleton. Plays a role in skeletal muscle formation through regulation of myoblast fusion (By similarity).
