

Anti-SPI1 / PU.1 Antibody

Rabbit Anti Human Polyclonal Antibody Catalog # ALS17274

Specification

Anti-SPI1 / PU.1 Antibody - Product Information

Application WB, IHC-P, E
Primary Accession P17947
Predicted Human
Host Rabbit
Clonality Polyclonal
Isotype IgG

Calculated MW 31083
Dilution WB~~

n WB~~1:1000 IHC-P~~N/A E~~N/A

Anti-SPI1 / PU.1 Antibody - Additional Information

Gene ID 6688

Alias Symbol
Other Names

SPI1, 31 kDa-transforming protein, 31 kDa transforming protein, PU.1, SFPI1, SPI-1, SPI-1 proto-oncogene, SPI-A, Transcription factor PU.1

Target/Specificity Human SPI1 / PU.1

Reconstitution & Storage

PBS, pH 7.4, 0.03% Proclin 300, 50% glycerol. Long term: -20°C; Short term: +4°C. Avoid repeat freeze-thaw cycles.

SPI1

Precautions

Anti-SPI1 / PU.1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-SPI1 / PU.1 Antibody - Protein Information

Name SPI1

Function

Pioneer transcription factor, which controls hematopoietic cell fate by decompacting stem cell heterochromatin and allowing other transcription factors to enter otherwise inaccessible genomic sites. Once in open chromatin, can directly control gene expression by binding genetic regulatory elements and can also more broadly influence transcription by recruiting transcription factors, such as interferon regulatory factors (IRFs), to otherwise inaccessible genomic regions (PubMed:23658224,

PubMed:33951726). Transcriptionally activates genes important for myeloid and lymphoid lineages, such as CSF1R (By similarity). Transcriptional activation from certain promoters, possibly containing low affinity binding sites, is achieved cooperatively with other transcription factors. FCER1A transactivation is achieved in cooperation with GATA1 (By similarity). May be particularly important for the pro- to pre-B cell transition (PubMed:33951726" target="_blank">33951726). Binds (via the ETS domain) onto the purine-rich DNA core sequence 5'-GAGGAA-3', also known as the PU-box (PubMed:33951726). In vitro can bind RNA and interfere with pre-mRNA splicing (By similarity).

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00237, ECO:0000269|PubMed:33951726}

Tissue Location

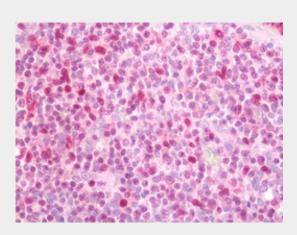

In the bone marrow, concentrated in hematopoietic stem cell, lymphoid progenitor, myeloid lineage (granulocyte macrophage progenitors, classical dendritic cells, monocytes) and B-cell clusters Among B-cells, predominantly expressed in pre-B1 cells (PubMed:33951726). Expressed in germinal center B-cells (PubMed:23166356).

Anti-SPI1 / PU.1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cvtometv
- Cell Culture
