

Anti-RAB35 Antibody (Internal)
Rabbit Anti Human Polyclonal Antibody
Catalog # ALS17429**Specification**

Anti-RAB35 Antibody (Internal) - Product Information

Application	WB, IHC-P
Primary Accession	Q15286
Predicted	Human, Mouse, Rat, Bovine
Host	Rabbit
Clonality	Polyclonal
Calculated MW	23025
Dilution	WB~~1:1000 IHC-P~~N/A

Anti-RAB35 Antibody (Internal) - Additional Information**Gene ID** 11021**Alias Symbol** **RAB35****Other Names**

RAB35, GTP-binding protein RAY, H-ray, RAB1C, Ras-related protein Rab-35, Ras-related protein Rab-1C, RAY

Target/Specificity

Recognizes endogenous levels of RAB35 protein.

Reconstitution & Storage

PBS, pH 7.3, 0.01% sodium azide, 30% glycerol. Store at -20°C. Aliquot to avoid freeze/thaw cycles.

Precautions

Anti-RAB35 Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-RAB35 Antibody (Internal) - Protein Information**Name** RAB35 ([HGNC:9774](#))**Synonyms** RAB1C, RAY**Function**

The small GTPases Rab are key regulators of intracellular membrane trafficking, from the formation of transport vesicles to their fusion with membranes. Rabs cycle between an inactive GDP-bound form and an active GTP-bound form that is able to recruit to membranes different sets of downstream effectors directly responsible for vesicle formation, movement, tethering and fusion (PubMed:30905672). RAB35 is involved in the process of endocytosis and is an essential rate-limiting regulator of the

fast recycling pathway back to the plasma membrane (PubMed:21951725). During cytokinesis, required for the postfurling terminal steps, namely for intercellular bridge stability and abscission, possibly by controlling phosphatidylinositol 4,5-bis phosphate (PIP2) and SEPT2 localization at the intercellular bridge (PubMed:16950109). May indirectly regulate neurite outgrowth. Together with TBC1D13 may be involved in regulation of insulin-induced glucose transporter SLC2A4/GLUT4 translocation to the plasma membrane in adipocytes (By similarity).

Cellular Location

Cell membrane; Lipid-anchor; Cytoplasmic side. Membrane, clathrin-coated pit. Cytoplasmic vesicle, clathrin-coated vesicle. Endosome. Melanosome. Note=Present on sorting endosomes and recycling endosome tubules (PubMed:16950109). Tends to be enriched in PIP2-positive cell membrane domains (PubMed:16950109). During mitosis, associated with the plasma membrane and present at the ingressing furrow during early cytokinesis as well as at the intercellular bridge later during cytokinesis (PubMed:16950109). Identified in stage I to stage IV melanosomes (PubMed:17081065). Colocalizes with ACAP2 and RUSC2 at the membrane protrusions of HEK293T cells (PubMed:30905672)

Anti-RAB35 Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.
