

Anti-TSG101 Antibody
Rabbit Anti Human Polyclonal Antibody
Catalog # ALS18331**Specification**

Anti-TSG101 Antibody - Product Information

Application	WB, IHC-P
Primary Accession	Q99816
Predicted	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	43944

Anti-TSG101 Antibody - Additional Information**Gene ID** 7251**Alias Symbol** **TSG101**
Other Names

TSG101, ESCRT-I complex subunit TSG101, Tumor susceptibility gene 10, Tumor susceptibility protein, VPS23, Tumor susceptibility gene 101, TSG10

Target/Specificity

Human TSG101

Reconstitution & Storage

Affinity purified

Precautions

Anti-TSG101 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-TSG101 Antibody - Protein Information**Name** TSG101**Function**

Component of the ESCRT-I complex, a regulator of vesicular trafficking process. Binds to ubiquitinated cargo proteins and is required for the sorting of endocytic ubiquitinated cargos into multivesicular bodies (MVBs). Mediates the association between the ESCRT-0 and ESCRT-I complex. Required for completion of cytokinesis; the function requires CEP55. May be involved in cell growth and differentiation. Acts as a negative growth regulator. Involved in the budding of many viruses through an interaction with viral proteins that contain a late-budding motif P-[ST]-A-P. This interaction is essential for viral particle budding of numerous retroviruses. Required for the exosomal release of SDCBP, CD63 and syndecan (PubMed:22660413). It may also play a role in the extracellular release of microvesicles that differ from the exosomes (PubMed:22315426).

Cellular Location

Cytoplasm. Early endosome membrane; Peripheral membrane protein; Cytoplasmic side. Late endosome membrane; Peripheral membrane protein. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome. Midbody, Midbody ring. Nucleus. Note=Mainly cytoplasmic. Membrane- associated when active and soluble when inactive. Nuclear localization is cell cycle-dependent. Interaction with CEP55 is required for localization to the midbody during cytokinesis

Tissue Location

Heart, brain, placenta, lung, liver, skeletal, kidney and pancreas

Anti-TSG101 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
